

Operator Manual

Version 5.7.3 - Mar-25

This documentation refers to the development status of Mar-2025. The texts and images were assembled with greatest care. Yet there can be minor discrepancies in program sequences or displayed texts that might occur as this product advances

We will appreciate suggestions for improvement or error reports.

Several of the hardware and software names mentioned in the document are trademarks and should be considered as such.

17	Appendix A -	SQL structure for e-FOLLO	w.cloud_records table	

1 Introduction

Thank you for subscribing to e-FOLLOW.cloud, the SaaS version of the well-known PrintManagement solution e-FOLLOW Professional for Toshiba e-BRIDGE Next and TOSHIBA eSF multifunctional printers providing features like

- △ Authenticated printing, copying, scanning and faxing
- Gecure print release
- Print-2-Me
- △ End-to-end encrypted printing
- color, print, copy, scan and fax quota management
- \bigcirc accounting for print, copy, scan and fax

The advantage of the SaaS approach is

- △ Avoid to install any server software on customer site
- △ Avoid to install any software on the user PCs
- △ Securely route all print jobs from any user device via the cloud to unlimited number of sites
- △ Support unlimited number of MFPs, users and sites per customer

This manual will guide the administrator through the setup of MFP devices, the onboarding to the SaaS application and the custom configuration.

1.1 Symbols in this manual

In this manual, some important items are described with the symbols shown below. Be sure to read these items before changing any configuration.

Indicates information to which you should pay attention

Warning:

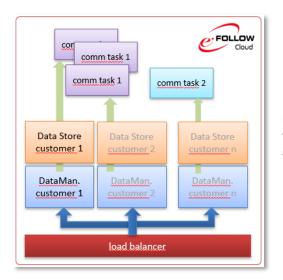

Indicates a situation where modification of the settings may have impact on correct operation.

2 General setup of e-FOLLOW.cloud

A core element of e-FOLLOW.cloud are the embedded Applications available for both, eBridge and eSF platform.

These once need to be installed on the device. The application will connect to the corresponding tenant instance and self-register the device.

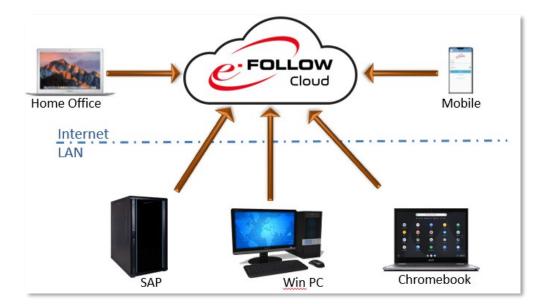

For security and GDPR-compliance reasons each customer is running an isolated DataManager and DataStore instance.

Resources consuming common tasks will be shared between the tenants and can - due to the cloud technology - be scaled up and down depending the actual workload.

All printing traffic from any client is securely sent from anywhere inside or outside your local network and securely held in e-FOLLOW.cloud until the jobs are requested by the user after authentication at the MFP.

3 Concept of queues and devices

e-FOLLOW.cloud is designed to manage, track and route print jobs from the users clients (PCs, mobile devices etc.) to Toshiba multifunctional printers (MFPs).

Thanks to its advanced design, e-FOLLOW.cloud does not need to install any additional local serverand client software. Print jobs are sent via SSL secured IPPS protocol from the client workstations to the e-FOLLOW.cloud virtual queues.

3.1 Virtual Queues

The concept of virtual Queues in e-FOLLOW.cloud is used to keep print jobs spooled on the server for a later release to a MFP when the user is in front of it.

Virtual IPP queue

A virtual IPP queue is an URL offered by e-FOLLOW.cloud IPP server. HTTPS is used to securely send jobs SSL encrypted from any clients to e-FOLLOW.cloud server. Print jobs that are sent to a virtual IPP queue will be spooled encrypted on the e-FOLLOW.cloud server until they are requested for printout at any device/printer or deleted (by user/admin intervention or due to a rule).

4 End-to-End encryption

e-FOLLOW.cloud offers highest security level by providing 100% end-to-end encryption of print job data.

The built in IPP Server allows clients to transmit print job data via secure socket connection HTTPs/IPPs to the e-FOLLOW.cloud server. The jobs held in a virtual queue for a later release are stored fully encrypted on the e-FOLLOW.cloud server's storage.

The jobs requested by the MFPs for printout are also sent SSL/TLS encrypted.

- \bigcirc Internet connection
- △ Toshiba e-BRDIGE Next MFP (Embedded Platform Framework Version 2.1.2 or higher)
 △ eSF-based MFP (V4.x or higher)
- Supported printer drivers:
 Toshiba V4 Printer Driver

 - 0 Toshiba Universal 2
 - Toshiba Universal PS3
 - Toshiba Generic PS3
 - o Toshiba Generic XL

6 Prepare e-Bridge Next devices

Before the e-Bridge device can connect to e-FOLLOW.cloud some preparations have to be done.

Make sure you have access to the following files and data

- △ Your Client-ID
- One-Time-Password

i

Hint

You find the embedded App and Server-URL in e-FOLLOW.cloud management → SETTINGS → General → Instructions & Configuration

During the onboarding process your reseller creates an account for you in e-FOLLOW.cloud. This will generate some custom specific data

- △ Client-ID
- △ Client specific ports
- One-time password

On behalf of your client-ID the custom specific URLs hostnames (and ports) are created.

General	
Customer	Customer name
Client ID	xxxx-yyyy your custom specific Client-ID
One Time Password	1234567890abc – a one-time password for your first
	login
HTTPS URLs	
for MANAGEMENT	https://management-xxxx-yyyy.e-follow.cloud
for USERPORTAL	https://userportal-xxxx-yyyy.e-follow.cloud
for IPP printing	https://ipp- xxxx-yyyy.e-follow.cloud
for EWB2	https://ewb2-xxxx-yyyy.e-follow.cloud
for ESF	https://esf-xxxx-yyyy.e-follow.cloud

8 e-FOLLOW.cloud – Quick start

Before you can start using e-FOLLOW.cloud some minimum configuration needs to be done.

8.1 First login to e.FOLLOW.cloud Management

Enter the Management URL (HTTPS://management-custom-ID.e-follow.cloud) provided by Toshiba in any web-browser.

eFOLLOW cloud		
	First login	
	Please enter your One Time Password:	
	Set your Operator password:	
	Password (at least 8 characters):	
	Repeat password:	
	Log in	
		4
	Version: 4.8.0 aks_8	

You will be prompted with e-FOLLOW.cloud first-login page.

Enter the One-Time-Password provided by Toshiba and select an Operator-password of your choice.

This new Operator password must not be lost. If you forget your password ask your Support to reset the password.

8.2 Virtual queue(s)

Generally, all print jobs are sent to one or several virtual queue(s) provided by the e-FOLLOW.cloud instance. The jobs are held until they are requested to be printed by the e-FOLLOW.cloud APP installed on each MFP.

Once a job is requested to be printed it will be downloaded by the App from e-FOLLOW.cloud storage.

i All

All communication, data storage and data transfers are SSL encrypted.

To create a virtual queue login to your instance of e-FOLLOW.cloud using:

https://management-YOUR_CUSTOM_ID.e-follow.cloud

8.2.1 Adding virtual IPP queue

To add a virtual queue, click to ADD and select the virtual queue type you wish to add.

	\& € Logo
cloud	ADD REMOVE SELECT
IANAGEMENT	Q, Search queue Image: Search queue [IPP Queue [IPP URLs] [Drawer and paper preconfiguration]
User list	Auto-delete jobs that have not been printed after 14 days
Departments	PP (2 Jobs) SELECT REFRESH: ON FILTER: OFF MODIFY
Permissions	□ p_cs_test (Ø Jobs) Name ⇔ User ⇔ Pages ⇔ Time ⇔
Projects Domains	IPP-Queue Testseite ingo.pfeiffer@contr 1 5/22/2024 5:12:09
Domanis	□ (p) (0 Jobs) e-FOLLOW - Q ingo.pfeiffer@contr 2 5/22/2024 5:10:32
EVICES Virtual Queues	ipp (0 Jobs) Microsoft Word ingo.pfeiffer@contr ingo.pfeiffer@contr 198 5/22/2024 5:10:31

To add a virtual IPP queue simply enter a name for the queue. The URL prefix is fix and cannot be changed.

Add IPP queue		×
Queue name	e-follow.ipp	
[Cancel]	add	

Clicking to [IPP URL] will show the IPPS URL for this virtual queue.

Q Search queue	Virtual IPP queue [IPP URLs] [Drawer and paper preconfiguration]	
e-follow.cloud	Auto-delete jobs that have not been printed after 14 days	
<pre>ipp_cs_test (0 Jobs)</pre>	Name ⇔ User ⇔ Pages ⇔ Time ⇔	
IPP URLs for s	elected queue	×
External IPPS	URL https://ipp-cs-3nmy.test.e-follow.cloud/e-follow.cloud [copy url]	[2
	ок	

Share the full URL [2] to the users so they can create an IPP port on their clients that points to this e-FOLLOW virtual IPP queue.

Use the lppInstaller-package for a more convenient way to install a IPPS printer queue on windows client PCs

8.3 **Users**

8.3.1 ADD (internal user) Click to Add to adding a new internal user. Login name, Username and password are mandatory.

If available, select a department the user is belonging to and enter his/her email address and home directory.

đ

The user's email address is registered to the Toshiba device when the user logs in and can be used according the <u>email address settings</u>.

If you allow 'unknown users to print' (\rightarrow SETTINGS \rightarrow General \rightarrow Application \rightarrow Print)

e-FOLLOW.cloud will automatically add users to it's internal-user database when they send their first print job to the server.

P. FOLLOW

8.3.2 LDAP Import /Synch

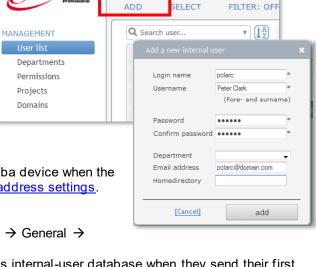

e-FOLLOW can synchronize users from multiple LDAP Servers. Clicking to [ADD] will allow entering the hostname/IP and credentials for an additional Server.

e-FOLLOW also supports **Microsoft Entra ID (Azure Active Directory)** and **Active Directory** for user synchronization. This will be explained later.

		×
Add an additional do	main	
Name	my LDAP *	
Hostname/IP Address	my.ldapserver.domain.com *	
Port	636 *	
SSL	••	
Base DN		
	Example: DC=domain,DC=local	
Admin DN	CN=admin,DC=domain,DC=local *	
	Example: CN=admin,DC=domain,DC=local Active Directory: CN=Administrator,CN=Users,DC=domain,DC=local	
Password	*	
	[Cancel] add	

LDAP import can only be performed if the LDAP Server supports SSL and paged search.

8.3.2.1 Domains – User import

Here the synchronization options are configured.

	Idap.forumsys.com (LDAP)	
User import	N 11 6	
Attribute names / Test	Name: Idap.forumsys.com	
	Order (with multiple domains)	4
Default user	OU filter	
Projects	(if at least one OU is set only users from that OU will be imported)	
Quotas		[+] [-]
	Replace internal users	
	Delete unknown users - else they 🕜 get deactivated	•
	Generate random PIN	
	PIN length	5
	Send PIN by email to user	

OU filter

ĩ

This allows you to import users only from specific OUs. Enter any part of the distiguishedName of the OUs you will like to import. This will also import users of any sub-OUs of the selected OUs.

 e-FOLLOW allows to deal with filters containing only the relevant part of the OU/group name.
 e.g. your domain structure contains sub-OUs "users" in each "branch"-OU like: OU=users,OU=branch-north,DC=domain,DC=com OU=users,OU=branch-south,DC=domain,DC=com OU=users,OU=branch-west,DC=domain,DC=com
 In this case you do not need to enter 3 filters but only
 OU=users or

OU=users,OU=branch

to avoid to import users from the common OU "users"

Replace internal users	If enabled, internal users will be replaces by the domain users in case of identical user names (Login name / samAccountName)
Delete unknown users	Domain users that are present in the e-FOLLOW database will be removed if the corresponding account in Active Directory does not exist anymore.
Generate random PIN	If enabled this will assign a random PIN to each user account
PIN length	Defines the number of digits for new PINs
Send PIN by email to user	Each user will receive an email containing the new PIN

i

8.3.2.2 Domains - Attribute names

The database fields in e-FOLLOW are retrieved from specific attributes in AD. By default, the attribute names are set to common values. Here you can change/ add the attribute names holding the data for the specific database fields.

User import		Idap.forumsys.com (LDA	Р)
Attribute names / Test		Name: Idap.forumsys.com	
		UID:	uid
Default user		(Active Direc	tory: sAMAccountName)
Projects		User Filter: (&	(objectClass=person)
Quotas		Display name:)
			Cri
		Alias:	cn
		Limit and shorten alias to allowed characters for windows login:	•
		Remove existing aliases before Import:	
	Ш	Email address:	mail
		Home directory:	homeDirectory
		Custom home directory Will be used if no home	
		directory is found. (Wildcard for username is ::username):	
		Department:	department
		Card ID:	
		Login-PIN:	
		Test	
		Username / ID:	[Test]

The **'custom home directory'** can be used to define a user's homeDirectory even if it can't be retrieved from the directory service. Enter the SERVER & PATH and if required "::username" as a wildcard for the user login name (sAMAccountName)

you can define the user is for newly imported from this domain.	User import Attribute names / Test Default user	Idap.forumsys.com (LDAP) Name: Idap.forumsys.com Activated	- 1
	Projects	Accounting	~
	Quotas	Popup profile None	~
		Print settings Print all jobs immediately after login ("Quickprint") Notify user if "QuickPrint" failed Keep print jobs after printing for reprint Show "Keep print jobs" option in job list Show print and keep button Force duplex printing Enable duplex printing by default Enable simplex printing by default	
		Force mono printing	
		Enable black & white printing by default	
		Force erasable 🕜 blue	
		Do not print if the	

8.3.2.3 Domains - Default user

Here y setting users

Deactivated	New users can be imported in 'deactivated' mode. In this case they cannot print or login to any device.
Accounting	Select the accounting mode for new users.
Popup profile	Select a popup profile for new users
Print settings	Select the print settings for new users
EWB settings	Select if the print job list shall be shown immediately and the sort order of the job list.

As your e-FOLLOW.cloud instance is not a domain-member you will see a message "No domains available".

Click to ADD and enter the hostname of the LDAP server and the credentials of an administrative user as described above.

8.3.3 Self-register @ User Portal

If enabled in Management Allow self-registration

If enabled users can self-register an internal account to e-FOLLOW. An appropriate link will be shown on the User Portal login page.

e-FOLLOW cloud			*)
	Username:		
	Password:		۲
		[Microsoft login] [Create account] Create login	Log in
Version: 5.6.0 RC05			∰ EN ▼

Attention Make sure the SMTP settings are correct, as e-FOLLOW.cloud will send out a confirmation email to the user.

8.3.4 USER - CSV Import

User data can be easily added or modified via .csv file. This function allows to add new (internal) users to the e-FOLLOW database and to modify or add data to existing user accounts.

	o rt file: Upload new CSV i	mport file			[1]
User nam (Valid val If the use	lues for Accountin er already exists r	word,Pin,Alias,Card ID,I g type: None, Protocol, new values for Alias, Car	Balance, Quota, Qu d ID and Email Add	iotaAndBalance) ress will be added.	
All other	values will be ove	rwritten. In general, en	pty values from the	e CSV file are ignored	
Separat	or:		Comn	na 🗙	[3]

[1] Import file:

Here you can upload a .csv file containing user data.

Valid values for Accounting type are

- None
- Protocol
- Quota

You can easily upload/replace the user_import.csv file by pressing the button Upload new CSV file.

[2] Syntax

Make sure the structure of the .csv file is correct. The first line will be imported too.

[3] Separators

Here you can define the field separators (comma, semicolon or tab stop).

[4] Check during import

Here you can define if all fields should be imported as they are or if pin, alias, card-id and e-mail address should be only imported if not used by any existing user.

If the user already exists new values for Alias, Card ID and Email Address will be added. All other values will be overwritten. In general, empty values from the CSV file are ignored. All informations about import status and errors can be found in the dashboard.

8.4 Windows Client setup

For security reasons e-FOLLOW.cloud does only accept print jobs sent via IPPS.

8.4.1 Adding a Windows IPP printer

In the add-printer dialog select "a shared printer by name"

		×
	Add Printer	
	Find a printer by other options	
Enter the IPPS-printer URL	O My printer is a little older. Help me find it.	
generated by e-FOLLOW.cloud	Find a printer in the directory, based on location or feature	
	Select a shared printer by name	
	Browse	
	Example: \\computername\printername or http://computername/printers/printername/.printer	1
	○ Add a printer using a TCP/IP address or hostname	
	○ Add a Bluetooth, wireless or network discoverable printer	1
	O Add a local printer or network printer with manual settings	
	Next Cancel	
	Add a local printer or network printer with manual settings	

You'll find the URL for a given virtual queue in Management.

click to [IPP URL]		🕸 🔵 🕻 🛛 Logout
	Cloud	ADD REMOVE SELECT
copy the URL and enter into above "select printer by	MANAGEMENT User list Departments	Q. Search queue Image: Search queue growth and paper preconfiguration] Auto-delete jobs that have not been printed after 14 days Image: Search queue growth and paper preconfiguration] Auto-delete jobs that have not been printed after 14 days Image: Search queue growth and paper preconfiguration] Auto-delete jobs that have not been printed after 14 days Image: Search queue growth and paper preconfiguration] Auto-delete jobs that have not been printed after 14 days Image: Search queue growth and paper preconfiguration] Auto-delete jobs that have not been printed after 14 days Image: Search queue growth and paper preconfiguration] Image: Search queue growth and paper
name" field.	Permissions Projects Domains	External IPPS URL https://ipp-cs-test.test.e-follow.cloud;443/e-follow.cloud [copy url] 1 5/22/2024 5:10:32
	DEVICES Virtual Queues	OK 8 5/22/2024 5:10:31

Finish the add-

printer dialog by selecting the desired printer-driver (TOSHIBA V4 Printer Driver is recommended).

8.4.2 IPP printer Installer

e-FOLLOW provides a convenient Installer to easily setup IPP-Queues on any Windows-Client.

€ e-FOLLOW IPP Printer Installer v2.0.0 ×				
Printer name:	e-follow.cloud			
IPP server URL:	https://ipp-toge-woaw.t	est.e-follow.cloud:44		
Printer driver:	TOSHIBA V4 Printer			
Install certificate				
✓ Install printer driver				
	Install Printer			

Users can download a lppInstaller package with configuration at the user-portal. At the Userportal configuration in Management you can choose the type of package, silent installation, printer driver and printer configuration.

	Туре	Name	In	staller 🕊		Details
Ingo Pfeiffer	(PP)	e-follow.cloud	IppInstaller.exe (preconfigured)	Archive (.zip)	Windows Installer (.msi)	Show details
History Print jobs Upload TOOLS Install Printers						

i

IppInstaller.exe must be executed as Administrator.

It is also possible to create an individual lppInstaller-packages, suitable for your current requirements. Therefore you can download lppInstaller.zip from the Instructions & Configuration page at e-FOLLOW.cloud Management.

8.4.3 e-FOLLOW client PopUp

The Windows clients in your network can be configured to have a window pop up after each print job, allowing the user to add additional information to the print job. e-FOLLOW provides different PopUp types according the custom requirements.

PopUp type	purpose
Confirmation	Provides a PopUp message containing the current print job information (number of pages, document name, etc.)
Username	This allows the user to enter / change the username (owner) of the current print job. (delegate job)
Username & Password	This type is intended for 'anonymous' workstations running under a guest account and requests to enter the username and password for assigning the current print job to a specific user.
Project selection	This PopUp provides a list of project codes to the user for assigning the print job to a specific project / sub-project.
Project selection & User credentials	This is a combination of the project selection PopUp and the Username & Password PopUp.

Q Search user	Peter Clark (pc)	=
Peter Clark	Authentication	*
Test user	Advanced Settings	~
U test	Email address: pc@domain.com [+] [-]	
	Department: Softwaresupport Homedirectory:	
	Popup profile: None	
	[Permissions] Confirmation Username Username with password Project selection	
	Project selection with credentials	~
	EWB/Print settings	~
	Projects	~
	Teamprint	~

The PopUp type can be selected individually for each user.

The Client PopUp does not need to be restarted if the PopUp type has changed.

8.4.4 Default PopUp type

e-FOLLOW allows to define a default PopUp type that will be assigned to the user accounts while they are imported from the domain.

Attribute names / Test	Activated	
Default user		
Projects	Accounting	Log 🗸
Balance	Popup profile	Confirmation V None
Quotas	Print settings	Confirmation Username Username with password
	Force duplex	Project selection Project selection with credentials

8.4.5 Executing the e-FOLLOW client PopUp

The e-FOLLOW PopUp executable can be downloaded from e-FOLLOW.cloud Management \rightarrow SETTINGS \rightarrow General \rightarrow Popup.

Application	Download: e-FOLLOW PopUp.exe (version: 2.6.0)
Userportal	e-FOLLOW PopUp Configuration (from version 2.5.0 this configuration will automatically be integrated into to file e-FOLLOW PopUp.exe. For more configuration options, see the documentation.)
Рорир	Configuration: -ip=popup-cs-test.test.e-follow.cloud -port=443

A good way to distribute e-FOLLOW PopUp would be to copy the executable to a shared network folder and copy it to the workstations via login or startup script.

i

If you download e-FOLLOW PopUp.exe from the management the .exe file will contain its configuration.

Configuration options can be overwritten by command line or via e-FOLLOW PopUp.ini file.

allow_closing	This option allows to quit e-FOLLOW PopUp by right clicking to the tray icon
lang=	This option forces e-FOLLOW PopUp to use the language specified. (e.g. lang=nl)
ip=	Enter the URL provided by Toshiba- This setting is mandatory!
port=	Enter the Port number provided by Toshiba. This setting is mandatory!
debug	This option will create debug messages in case of connection issues. The messages can be seen when right clicking to the tray icon -> INFO

To run e-FOLLOW PopUp automatically when a user logs on, create a shortcut in Startup menu or add e-FOLLOW PopUp.exe to a login script.

Above options can also be used as command line options. In this case they need to be started with a dash '-'. e.g.

\e-FOLLOW PopUp.exe -allow_closing -ip=cutomer.e-follow.cloud -port=12345 -lang=nl

e-FOLLOW PopUp will place a icon to the system tray. Right clicking the icon will give you the Info option and - if enabled - the option to exit the e-FOLLOW PopUp.

8.5 e-FOLLOW Web-PopUp

Beside the Windows-PopUp executable, e-FOLLOW provides a platform independent PopUp based on Web-Browser technologies.

To enable it, first you have to activate the PopUp for the UserPortal.

Instructions &	Popup activated for Userportal
Configuration	Unknown users
DataBase /	Unknown users's profile Username 🗸
Support	Create unknown users automatically, when they log in by PopUp for the first time
License information	Download: e-FOLLOW PopUp.exe (version: 2.6.0)
Application	e-FOLLOW PopUp Configuration (from version 2.6.0 this configuration will automatically be integrated into to file e-FOLLOW PopUp.exe. For more configuration options, see the documentation.)
Userportal	Configuration: -ip=popup-cs-test.test.e-follow.cloud -port=443
орир	
	٦

Then you will see the green Web-PopUp if you start e-FOLLOW UserPortal with your URL:

https://userportal-custom-ID.e-follow.cloud

FOLLOW			₩ _ • (Popup 🛦
	Username: Password:	ingo.pfeiffer		٢
	[Micro	soft login] [Create account] 🗌 Ren	nember <mark>l</mark> ogin	Log in
Version: 5.6.0 RC05				ten ▼

For each print job the PopUp will now show up with the PopUp-type according the user's configuration.

🔮 Microsoft Word - e-FOLLOW-Operator_Manual_EN_4.6.docx - Profil 1 – Microsoft Edge	-		×
i about:blank

Skip popup for the next print jobs. Skip popup for the next minutes.			
Cancel	C	onfirm	

8.6 IPP printing from MAC

e-FOLLOW.cloud can not only receive print jobs from Windows clients but also from Mac and Linux.

To print to a virtual queue configure your Mac as follows.

Visit <u>http://business.toshiba.com/support/index.jsp</u> to download an appropriate driver for your MFP.

Follow the installation instructions of the driver package...

8.7 **Printing from Chromebooks**

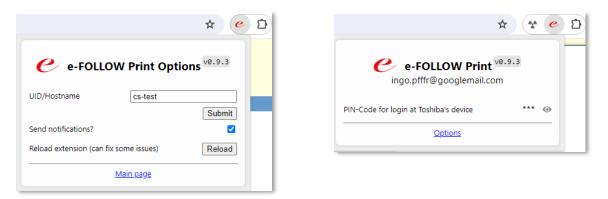

With the e-FOLLOW Print Chrome Extension you can easily distribute e-FOLLOW queue to users which are using Google Chrome browser or working on a Chrome Book.

It can be retrieved from the Chrome Web Store or directly from this URL: <u>https://chromewebstore.google.com/detail/e-follow-print/fjpnapffembidnjnpnicglbfadococcp</u> Or click on the link at SETTINGS→User portal & User tools→Chrome Extension.

After installing the extension it will show it's options dialog. When you are using it outside a Google Workspace or the admin hasn't set the policy for the extension you have to enter the UID (for e-FOLLOW.cloud) or Hostname (for e-FOLLOW).

At the Main page of the extension you can access you PIN-Code for login at Toshiba devices.

The e-FOLLOW queues then will be shown additional to the other available printers when the user selects a printer.

8.8 **Printing from mobile devices**

e-FOLLOW provides a mobile application for iOS and Android that allows users to upload documents to the e-FOLLOW.cloud server.

The Apps are already prepared to also perform release of print jobs. Therefore, the e-FOLLOW.gateway service is required that is currently not available.

Get the App from iTunes or Playstore by searching for "e-FOLLOW" or simply scanning below QR-code:

0	09:01 al 🗢 🖿

	Online Erfolgreich verbunden									

OK

To connect the app enter the correct server settings provided by Toshiba.

Server: mobile-customID.e-follow.coud Port: 443

Make sure to enter the Server Hostname **without https://** The Server **Port 443** (SSL) must not be changed!

Clicking to 'Test connection' to make sure the App is properly connected and online.

9 e-FOLLOW.cloud reference

This chapter describes the sequence of menus, functions, parameters and it's dependencies.

9.1 MANAGEMENT

The user menu contains all data and settings related to users. The e-FOLLOW.cloud database can hold user data imported from the local domain (Active Directory) as well as 'internal' users (users that do not have an AD-account)

9.1.1 User list

The user list table shows all users (domain & internal) stored in the e-FOLLOW.cloud database.

cloud	ADD SELECT FILTER: ON MANAGE MODIFY CSV IMPORT [2]	
NAGEMENT User list	Q Search user Robert Boyle (boyle)	=
Departments Permissions	Robert Boyle	
Projects	Marie Curie Login name: boy	
Domains	Curre DistinguishedName: uid=boyle,dc=example,dc=cor Albert Einstein Login type: LDAP (ldap.forumsys.corr	
CES	Euclid Activated:	
'irtual Queues oshiba	Leonhard Euler Login-PIN:	
oshiba eSF	Galileo Galilei Aliases: RobertBoyle	
Nobile print	Carl Friedrich Gauss	-
RT	Card IDs: [+]	
leports	Alfred Nobel Advanced Settings	~
INGS	No Group nogroup Email address: boyle@ldap.forumsys.com	
eneral	Louis Pasteur	
ser portal & ser tools	Eenhard Riemann [+] [-]	_
ashboard chedules	Department:	a
chedules	Homedirectory:	-
Reader profiles	[«] [<] [>] [»] Popup profile: None V	-

The List shows the users Username and Login name.

[1] On the right you see the user details sections to modify the

- User's Authentication settings
- Advanced settings
- User role
- Accounting settings
- EWB/Print settings
- User's Projects
- Teamprint

[2] Above the list you find the options to

- Add internal users
- Select users
- Setting filters for the user list
- Manage user accounts
- Modify user accounts
- CSV Import
- Export userdata

9.1.1.1 Search user

To search for a specific user e-FOLLOW.cloud provides a convenient search engine.

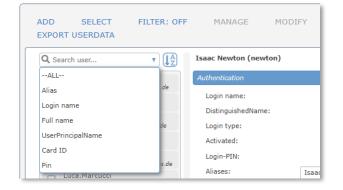

ADD EXPORT	SELECT USERDATA	FILTER: OFF	r r
Q Sear	ch user	▼ ↓	Isaac
	est 0001		Authe

Enter any phrase into the search window. e-FOLLOW.cloud will query all relevant fields

- Alias
- Login Name
- Full Name
- UserPrincipalName
- Card- ID
- PIN

for that phrase.

The search can be narrowed down by selecting a specific field to be searched.

Use the 😥 symbol to change the sort order of the search results.

9.1.1.2 ADD (internal user)

Click to Add to adding a new internal user. Login name, Username and password are mandatory.

If available, select a department the user is belonging to and enter his/her email address and home directory.

The user's email address is registered to the Toshiba device when the user logs in and can be used according the <u>email</u> <u>address settings</u>.

		×
Login name Username	pclarc * Peter Clark * (Fore- and surname)	
Password Confirm password	•••••• * •••••• *	
Department Email address Homedirectory	▼ pclarc@domain.com	
[Cancel]	add	

9.1.1.3 SELECT (users)

Using this option will help you to select/unselect multiple users.

[1] checking [v] will move the user to the selected users box [2]

Clicking to x will unselect the user and remove him from the selected user box

9.1.1.4 FILTER

The filter option allows setting a filter to the list of users by different criteria.

ilter all users accordi	ng the following criteria:		
General			
Login type	Microsoft Entra ID (Azure AD) users only 💙	Domain	~
User status	~	Department	~
Aliases	~	Card IDs	with Card IDs only
Login-PIN	~		
Accounting			
Accounting mode	~		
			[reset]
		[Cancel]	filter

When a filter is active (set) this is indicated by a highlighted **FILTER: ON** in the function bar.

9.1.1.5 MANAGE

Use the manage function to disable/enable or delete a single or a number of selected users.

ADD	SELECT	FILTER: OFF		MANAGE	MODIFY	0
EXPO	RT USERDATA			Disable sel	ected users	
Q 56	earch user	▼ ↓A Se	е	Enable sele	ected users	
	Robert Boyle		>	Delete sele	cted users	
	CloudPrint cp@control-systems.de		×	Robert Boyle		

Before the execution of a management function, you are requested to confirm this action.

	3
You have selected 2 users. Are you s	ure to disable them?
[Cancel]	disable

9.1.1.6 MODIFY

The modify function allows a couple of modifications to the accounts of the selected users.

	SELECT	FILTER: ON	MANAGE	MODIFY	CSV IMPORT
AF O	KI USEKDAIA			Change de	epartment
Q Se	earch user	▼ ↓AZ	Selected users:	Change po	opup profile
	Robert Boyle		× Galileo Galilei	Change ac	counting mode
	Marie Curie curie		× Carl Friedrich (Change pr	int settings
	Albert Einstein einstein			Change pr	oject settings
	Euclid euclid			Set quotas	5
	Leonhard Euler euler			' Change us	
	Galileo Galilei galieleo				
	Carl Friedrich Gauss				

Change department

Assign a department to the selected user/s.

Change accounting mode

Select the accounting mode for the selected user/s.

Attention

If you change the accounting mode to "Use quotas" you must make sure that quotas are set correctly. Else the users may not perform any printouts or copies.

Change accounting mode	
Use this accounting mode for 2 selected users	:
 No accounting All activities are logged only Use quotas 	
[Cancel] apply	

Change print settings

Here you can change the general print setting used on Toshiba devices for the selected users.

The settings can be

- enabled, overwriting any settings done for departments or devices
- Image: will be unchanged. Settings will be taken as defined by departments or devices
- Import disabled, overwriting any settings done for departments or devices

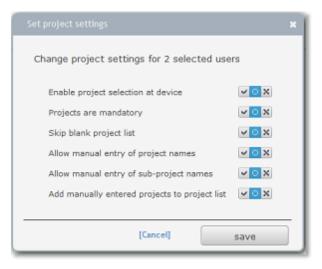

Set print settings		×
Change print settings for 2 selected users		
Print all jobs immediately after login ("Quickprint")	V O X	
Notify user if "QuickPrint" failed	V O X	
Keep print jobs after printing for reprint	V O X	
Show "Keep print jobs" option in job list	V O X	
Show print and keep button	V O X	
Force duplex printing	V O X	
Enable duplex printing by default	V O X	
Enable simplex printing by default	✓ ○ ×	
Force black & white printing	V O X	
Enable black & white printing by default	V O X	
Force erasable blue printing	V O X	
Do not print if the device displays the warning "Low Paper"	V O X	
Print job list sorted by	~	
Show print job list immediately	VOX	
Automatic deletion of jobs		
At logout	V O X	
Cancel running jobs	V O X	
Delete on error after	V O X	seconds
	[Cancel]	save

Set project settings

Her you can change the project settings for the selected users.

The settings can be

- Setting will be set to enabled
- vill be taken as defined previously
- Setting will be set to disabled

Set quotas

Here you can set quotas for the selected users. If you do not wish to use quotas for a certain function - e.g. faxing, scanning - you can disable the use of quotas by clicking to [disable].

The page quota field gets grayed out and the link changes to **[enable]**.

This will make the selected function 'unlimited'.

Quotas are only checked at user login at the MFP. They are not used to interupt jobs. Therefore it is possible for users to have negative quotas.

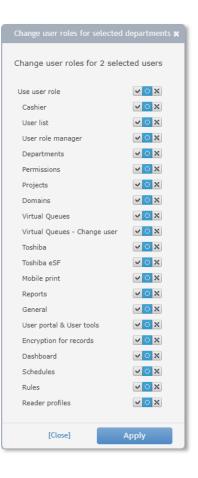

Set quotas			×				
Set quotas for the selected user							
Total quota:	[disable]	5000	Pages				
Color quota:	[disable]	350	Pages				
Print quota:	[disable]		Pages				
Copy quota:	[disable]		Pages

Fax quota:	[disable]		Pages				
[Cancel] safe							

Change User Roles

Here you can modify the Roles assigned to the selected users.

The settings for roles can be

- role will be enabled
- Ieft unchanged. Settings will be taken as defined previously
- vole will be disabled

9.1.1.7 USER - CSV Import

User data can be easily added or modified via .csv file. This function allows to add new (internal) users to the e-FOLLOW database and to modify or add data to existing user accounts.

ι	Upload new CSV i	mport file			[1]
User nam (Valid val If the use	ues for Accountin er already exists r	word,Pin,Alias,Card ID,t g type: None, Protocol, new values for Alias, Car rwritten. In general, en	Balance, Quota, Quo d ID and Email Addr	otaAndBalance) ress will be added	
Separato	or:		Comm	ia 🗸	[3]
			ail address 🛛 👝		

[1] Import file:

Here you can upload a .csv file containing user data.

You can easily upload/replace the user_import.csv file by pressing the button Upload new CSV file.

[2] Syntax

Make sure the structure of the .csv file is correct. The first line will be imported too.

Valid values for Accounting type are

- None
- Protocol
- Quota

[3] Separators

Here you can define the field separators (comma, semicolon or tab stop).

[4] Check during import

Here you can define if all fields should be imported as they are or if pin, alias, card-id and e-mail address should be only imported if not used by any existing user.

If the user already exists new values for Alias, Card ID and Email Address will be added. All other values will be overwritten. In general, empty values from the CSV file are ignored. All informations about import status and errors can be found in the dashboard.

9.1.1.8 User details / Authentication

To view or modify the user details just click to the name of the desired user.

× ingo \mathbf{v}	1	ngo Pfeiffer (ingo.pfeiffer	r@control-systems.de)

	Denis Staritin denis.staritin@control-sy:	○ Use quot	as		~
	ds ds	[Cancel]	change		~
	Albert Einstein		reamprinc		~

To select a new accounting type, click to [change] and select the desired accounting mode.

No accounting: nothing will be tracked and logged for this user

Only log activities: All activities (print, copy, scan, fax) are logged in the e-FOLLOW.cloud transaction database. But the user is not restricted/limited.

Use Quotas:

The user account is limited by quotas.

ccounting		
Use quotas ?		[change]
Total quota:		200 Pages
Color quota:		50 Pages
Print quota:		Pages
Copy quota:		Pages
Scan quota:		Pages
Fax quota:		Pages

Beside a total 'over all' quota you can define additional quotas for color usage, prints, copies, scans and faxes.

Attention

Quotas can also be set for Departments and Devices. So it might happen that even if the user still has e.g. color quota available he can't do color prints or copies if the color quota of his department or the color quota of the device is used up.

Quotas are only checked at user login at the MFP. They are not used to interupt jobs. Therefore it is possible for users to have negative quotas.

9.1.1.12 User details / EWB/Print settings

Here you can define basic EWB and print settings on e-BRIDGE for this user.

WB/Print settings		
Note: The priority of the print settings is User->Departm	nent->Device	
Print all jobs immediately after login ("QuickPrint")		
Notify user if "QuickPrint" failed)
Keep print jobs after printing for reprint		
Show "Keep print jobs" option in job list		
Show print and keep button		
Force duplex printing		
Enable duplex printing by default		
Enable simplex printing by default		
Force black & white printing		
Enable black & white printing by default		
Force erasable blue printing 🕜		
Do not print if the device displays the warning "Low Paper"		
Print job list sorted by	Date (new -> old)	~
Show print job list immediately		
Automatic deletion of jobs (This will activate	e single print)	
At logout 🕐		
Cancel running jobs		
Delete on error after	120 econds	

Print all jobs immediately after logging in (QuickPrint):	If enabled all pending jobs for this user will be released immediately after login (print selection screen is not shown)
Notify user if "QuickPrint" failed	If there was an error while printing jobs immediately after login the user will receive a notification by email or popup.
Keep print jobs after printing for reprint	The checkbox "Keep job after printing" is checked by default.
Show "Keep print jobs" option in job list	Selects if the checkbox "Keep job after printing" is visible or not.
Show print and keep button	Will enable an extra button with "print & keep" next to the print button.
Force Duplex printing:	all printouts on e-BRIDGE devices will be converted to duplex
Force Duplex printing: Enable duplex printing by default	
	duplex In case the Force duplex is set to off, you can configure if
Enable duplex printing by default Enable simplex printing by	duplex In case the Force duplex is set to off, you can configure if the Duplex setting is enabled by default. In case the Force duplex is set to off, you can configure if
Enable duplex printing by default Enable simplex printing by default:	duplex In case the Force duplex is set to off, you can configure if the Duplex setting is enabled by default. In case the Force duplex is set to off, you can configure if the Simplex setting is enabled by default.

Do not print on"Low Paper":	If enabled printing cannot be started if the device has low paper or no paper warning
Print job list sorted by:	Select the default sort order for the print job list
Show print job list immediately:	if enabled, the welcome screen will be skipped

Automatic deletion of jobs

The Automatic deletion of pending jobs on Toshiba / Toshiba eSF devices settings defines the treatment of jobs that have already been selected for printing in case of an error, user log out or user login.

This will ensure that documents will only be retrieved by the authorized user.

At L	.ogoi	ut
------	-------	----

As soon as the user is pressing the logout button, e-FOLLOW.cloud removes all jobs form the device's job list.

To prevent removing the current job list due to auto-logout it is recommended to set the **Autoclear** function on the device to **'No limit'**

Cancel running jobs	If enabled the currently running job is stopped and removed
	additionally. Else the running job will be finished.
Delete on error after	This will delete the current job that caused an error (e.g. paper jam) and the pending job list after xx seconds. If the error gets fixed in between the xx seconds, the device will continue to print and to process the user's current job list.

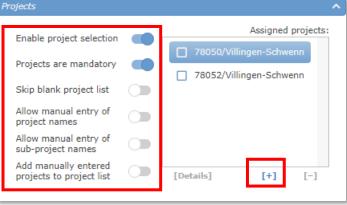

Once, one of the 'Automatic deletion of jobs' option is enabled, the printing system will change to single-print-mode. This means that a next job of a selected list of jobs will not be sent to the device before the prior job has been completely finished.

9.1.1.13 User details / Projects

Click to [+] to add one or multiple projects to the list of user assigned projects.

Global project can't be assigned to

a user as they are available by

default.

You can define the handling of Project Codes in e-FOLLOW.cloud.

i

Enable project selection.	This enables the project selection for jobs on e-BRIDGE devices (EWB client) for the current user.
Project are mandatory	If enabled the selection of a project code is mandatory. Jobs without a project code will be cancelled.
Skip blank project list	If a user does not have any project codes assigned (and there are no global projects available) the user will not be prompted to select a project code when this option is enabled.
Allow manual entry of project names	In addition to select project codes from a list, the user can be allowed to manually enter a project code.
Allow manual entry of sub- project names	same for sub-project codes.
Add manually entered projects to list	If enabled, the manually entered project code will be added to the user's project code list.

Global projects (projects that are available to all users) cannot be added to the list.

9.1.1.14 User details / TeamPrint

Here you can allow this user to release jobs originally printed/owned by other users.

	boyle Verwaltung	
	[+] [-] [+] [-]	
	Groups (Entra ID) Entwicklung	
		101
	User can create jobs, which don't appear in teamprint	[2]

[1] Select individual users or departments or groups.

[2] Privacy setting

This option allows the user to flag individual print jobs as 'private' jobs. These jobs will not be seen in the print job list on the MFP or mobile device by any other users, even if they have been granted the right to release his jobs.

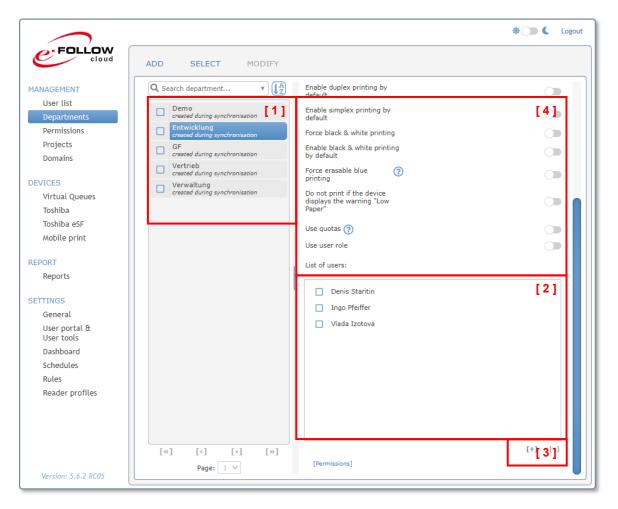

To flag print jobs being private the client PopUp must be executed on the users Workstation.

C Invoice-3324-03-2014.rtf	
Invoice-3324-03-2014.tf 1 Page	e.Follow
Hide popup for the next jobs. Hide popup for the next minutes.	
Make this job private	Cancel Send

9.1.2 Departments

Departments are organizational units. Each user may belong to only one department. Usually the association of users to departments is done in Active Directory.

When synchronizing the domain e-FOLLOW.cloud automatically imports all departments and the association of users.

- 1. List of departments
- 2. List of users belonging to the selected department
- 3. press ADD to manually add a department
- press [+] to manually add users to the selected department
- 4. enable QuickPrint; enable/show keep print jobs; enable/force duplex printing; enable simplex by default; enable/force black&white printing; force erasable blue printing; enable prevent printing at low paper; set quotas and user roles for the selected department.

9.1.2.1 Use Quotas

Similar to user's quotas you can define quotas for departments as well.

Beside a total 'over all' quota you can define additional quotas for color usage, prints, copies, scans and faxes.

Attention

Quotas can also be set for Users and Devices. So it might occur that even if the Department still has color quota available a user can't do color prints or copies if his personal color quota or the color quota of the device is used up.

Quotas are only checked at user login at the MFP. They are not used to interupt jobs. Therefore it is possible for users to have negative quotas.

Q Se	earch department	▼ ↓AZ	Description:		created during synchronisation	[change]

			Rules	
			Reader profiles	
			List of users:	
			Denis Staritin	
[«] [<] [>] [»]		Ingo Pfeiffer	
	Page: 1 💙			

Use user role: If enabled, user roles get enabled for all users belonging to the selected department and you now can assign the desired roles to all users.

Attention

Disabling a user role will revoke the role from all users of that department.

9.1.2.3 Search for departments

To search for a specific department e-FOLLOW.cloud provides a convenient search engine.

ADD	SELECT	MODIFY
× ent		▼ ↓AZ
Entwicklung created during synchronisation		

Enter any phrase into the search window. e-FOLLOW.cloud will query all relevant fields

- Name
- Description

for that phrase.

The search can be narrowed down by selecting a specific field to be searched or by departments that are configured with **Quota in use** or **with Quota disabled**.

ADD	SELECT	MODIFY
Q Searc	h department	▼ (IAZ)
ALL		
Name		
Descripti	on	
Quota in	use	
Quota di		
- cn	eated during synchro	onisation

Use the given symbol to change the sort order of the search results.

9.1.3 Permissions

The concept of permissions in e-FOLLOW.cloud describes what functions & features users are allowed or denied when printing to a direct queue or using a Toshiba e-BRIDGE X device.

- 1. Permission settings are set for Toshiba or eSF devices.
- Device list: First of all permissions are globally set for All devices. By default all features are 'allowed'. Volume To deny a feature change its status to 'denied VON

By pressing **[+]** you can add single Toshiba devices (or direct queues). By default permissions are derived from the global settings for all devices. This is indicated by the status **vox**

3. The list of users shows whom the permissions are applied to. By default the settings are applied to **All users**. Similar to the devices you can add individual users, departments, AD security groups and Entra ID groups by pressing the corresponding link.

This allows to individually apply permissions for each combination of user, department, groups and devices.

- 4. To adjust permissions e-FOLLOW.cloud offers a tri-state setting switch for each feature.
 - **MON** The permission for this feature is passed through
 - ✓○区 This feature is denied

The Priority of permissions is organized hierarchically:

- 1. Toshiba device / direct queue
- 2. User
- 3. Department

9.1.4 Projects

In e-FOLLOW.cloud print and copy transactions can - in addition to user and departments - optionally be assigned to a Project code. Projects can be used. e.g. to charge back cost to projects or clients. Each project can have an unlimited number of sub-projects allowing the administrator to realize a fine grained accounting structure.

e-FOLLOW.cloud knows two types of projects:

global projects

these projects (and sub-projects) are available to all users.

personal assigned projects

these projects must be assigned to specific users. Only the assignees are able to select these projects and their sub-projects.

Each project code can be specified as a 'personal' project or 'global' project by enabling or disabling the **Available for all users** option.

Projects can either be selected at the e-BRIDGE embedded client, the workstation client popup or the mobile print release App.

9.1.4.1 Import Projects from .csv

ADD REMOVE SELECT IMPORT	
Import projects from CSV file	×
Import file: alle_piz_e-FOLLOW.csv	[1]
Upload new Project Import File	
Structure of the CSV file:	[2]
project,subproject,username Subproject and username are optional. Username must always be in third place	e.
IDROP_TABLE at the first line will delete all projects and user assignments.	[4]
Syntax for global projects:	
e.g. project1,subproject1 project1,subproject2 project2 project2,subproject1	
Syntax for user assigned projects: e.g. project1,subproject1,username1 project2,username1 project2,username1 project1,,username2	
Descriptions for project and subproject can be added with brackets: project1(description),subproject(description) For more information and examples see documenation.	
Separator: Comma 🗸	[3]
Brackets for descriptions Round brackets (Description)	
CSV Import of 14316 lines finished at 10:28:49.	
[Cancel import] Start import	

The list of projects, sub-projects and user assignment in e-FOLLOW.cloud can be imported via a .csv file.

[1] Import file:

Here You can easily upload / replace the project-csv file by pressing the button Upload new Project Import File.

[2] Syntax

Make sure the structure / syntax of the .csv file is correct. Please refer to the examples for global and user assigned projects.

Global:	project-name project-name, sub-project-name*
user assigned:	project-name,,username project-name,sub-project-name*,username

*) sub-project name is optional. Make sure, that in case of user assigned projects the username is placed as third field.

[3] Separators

Here you can define the field separators (comma, semicolon or tab stop) and the type of brackets containing the descriptions.

[4] **!DROP_TABLE** If you add the expression '!DROP_TABLE' at the first line of the .csv file all project codes and user assignments will be deleted before importing the data from .csv. Else new data will be appended.

9.1.5 Domains

e-FOLLOW.cloud supports the synchronization of users from the any directory service supporting a secure LDAP connection. Additionally, e-FOLLOW.cloud supports the synchronization of Microsoft Entra ID (Azure Active Directory (AAD)) and Windows Active Directory (not recommended for e-FOLLOW.cloud).

			寮 🔵 🕻 Logout

Synchronization will be performed immediately by clicking to [USER IMPORT] Users can also be synchronized automatically. Pease refer to the chapter **Schedules**.

ADD	REMOVE	MODIFY	USER IMPORT

9.1.5.1 Domains - ADD LDAP Domain

e-FOLLOW.cloud Professional can synchronize users from multiple directory services (AAD or LDAP Servers). Clicking to [ADD] and selecting LDAP will allow entering the hostname/IP and credentials for an additional Server.

Name	
Hostname/IP Address	*
Port	389 *
SSL	
Base DN	
	Example: DC=domain,DC=local
Admin DN	* Example: CN=admin,DC=domain,DC=local
	Active Directory: CN=Administrator,CN=Users,DC=domain,DC=local
Password	*
	[Cancel] add

LDAP import can only be performed if the LDAP Server supports SSL & paged search.

Attention

When 'Write new Cad-IDs to A.D.' is enabled, the user specified here must have write-permission.

9.1.6 Domains – ADD Microsoft Entra ID (Azure Active Directory)

To synchronize your Microsoft Entra ID users with e-FOLLOW.cloud, you need to prepare it to obtain/generate the following data:

- 1. Your Tenant ID
- 2. An application (client) ID
- 3. Secret Key

The Secret Key will expire after a certain time. Be sure to recreate it regulary or some feature of the Azure Active Directory like synchronization will fail.

9.1.6.1 Finding the Tenant-ID

Start the Azure portal and login with an Administrator account. Then select Microsoft Entra ID in Azure services.

Microsoft Azure		\mathcal{P} -Search resources, services, and docs	s (G+/)

In order to get the permissions effective, it is recommended to create a new App and apply above permissions instead of modifying an existing app.

9.1.6.3 Configuring e-FOLLOW.cloud domain Microsoft Entra ID (Azure Active Directory) synchronization

Click to ADD – Microsoft Entra ID (Azure Active Directory)

Name		*
Tenant ID		*
Client ID		*
Client Secret		*
@Domain (will be added to the username at printing at login if not present)	@your-azure-ad-domain-name.com	*
User self-enrollment 🕜	•	
	[Cancel] add	

Name	Enter a name of your choice for the directory service		
Tenant ID	Enter the Tenant ID of your AAD		
Client ID	Enter the Client ID of the service you just created		
Client Secret	Enter the Client Secret for the service you just created		
@domain	To simplify the login, this domain-addon will be added automatically to		
	the username at login, so the users do not necessarily need to enter their		
	full login name e.g. username.surname@my_domain.xxx		
User self-enrollment	This option disables automatic synchronization with Microsoft Entra ID		
	(Azure Active Directory)		
	(Explained in chapter 9.1.7 Domains – ADD Microsoft Entra ID (Azure		
	Active Directory) with User self-enrollment)		

9.1.7 Domains - ADD Microsoft Entra ID (Azure Active Directory) with User self-enrollment

If you need a more secure and limited access to Microsoft Entra ID (Azure Active Directory) users then use the User selt-enrollment feature.

There you also have to register an API for Microsoft Entra ID (Azure Active Directory) but without the rights to read all user informations.

Because of this synchronization of all users is no longer possible. Users have to add themselves manually at the e-FOLLOW user portal by entering their email address. Then they will be redirected to the Microsoft login page.

9.1.7.1 Create an application in Microsoft Entra ID (Azure Active Directory) with User self-enrollment

Start the Azure portal (<u>https://portal.azure.com</u>) and sign in with your Microsoft account and select "Microsoft Entra ID" in Azure services

Select "App registration" on the left and then click on "New registration"

Microsoft Azure	$\mathcal P$ Search resources, services, and docs (G+/)

9.1.7.2 Configuring e-FOLLOW.cloud domain Microsoft Entra ID (Azure Active Directory) synchronization with User self-enrollment

Click to ADD – Microsoft Entra ID (Azure Active Directory)

Add domain (Microsoft Entra ID (Azure Active Directory))		
Name Tenant ID		*
Client ID		*
©Domain (will be added to the username at printing at login if not present)	@your-azure-ad-domain-name.com	*
User self-enrollment ?		
	[Cancel] add	

Name	Enter a name of your choice for the directory service
Tenant ID	Enter the Tenant ID of your AAD
Client ID	Enter the Client ID of the service you just created
Client Secret	Enter the Client Secret for the service you just created
@domain	To simplify the login, this domain-addon will be added automatically to
	the username at login, so the users do not necessarily need to enter their
	full login name e.g. username.surname@my_domain.xxx
User self-enrollment	Switch on User self-enrollment

9.1.7.3 Domain - REMOVE

This will allow to remove a domain from e-FOLLOW.cloud.

Attention

When removing a domain all users, user settings and the jobs pending for these users will be deleted accordingly.

9.1.7.4 Domains – User import

Here the synchronization options are configured.

- Hanna Samana - Anna	1	CSAAD (Microsoft Entra ID)			
User import		Name: Control Systems GmbH & Co. KG	(CSAAD)		
Attribute names / Test		Order (with resulting descript)		_	
Default user		Order (with multiple domains)			1
Projects		Group filter (if at least one group is set only users from that groups will be imported)	Entwicklung All Company		
Quotas				[+]	[-]
		Ignore disabled AD user accounts			
		Ignore guest user accounts			
		Replace internal users			
		Delete unknown users - else they 👔			
		Generate random PIN			
		PIN length			5
		Send PIN by email to user			

Group filter	This allows you to import users only from specific Groups. Click to [+] to select a Group from your AAD.	Add group filter X Add additional filter: control-systems.de [Cancel] Add
Ignore disabled AD accounts	If enabled, accounts that are disab imported to the e-FOLLOW.cloud of	
Ignore guest user accounts	If enabled, only 'Member' type user accounts will be imported/synchronized to the e-FOLLOW.cloud database.	
Replace internal users	If enabled, internal users will be replaced by the domain users in case of identical user names (Login name / UserPrinzipalName)	
Delete unknown users	Domain users that are present in the e-FOLLOW.cloud database will be removed if the corresponding account in Azure Active Directory does not exist anymore.	
Generate random PIN	If enabled this will assign a random	PIN to each user account
PIN length	Defines the number of digits for ne	ew PINs
Send PIN by email to user	Each user will receive an email containing the new PIN	

9.1.7.5 Domains - Attribute names

The database fields in e-FOLLOW.cloud are retrieved from specific attributes. By default, the attribute names are set to common values. Here you can change/ add the attribute names holding the data for the specific database fields.

User import	Test (Microsoft Entra ID)	
	Name: Control Systems GmbH & Co. KG (test_for_	italy)
Attribute names / Test	Display name:	displayName
Default user	Alias:	displayName
Projects	Limit and shorten alias to allowed characters for windows login:	
Quotas	Remove existing aliases before Import:	
	Email address:	mail
	Home directory:	homeDirectory
	Custom home directory Will be used if no home directory is found. (Wildcard for username is ::username):	
	Department:	department
	Card ID:	
	Login-PIN:	
	Test	
	Username / ID:	
	Password (optional):	[Test]
		[Reset Entra ID Token]
		[Check Entra ID Token]

The Alias field is mandatory and essential for assigning print jobs. Therefore the Alias must be changed to fit to the Windows login name (Limit and shorten alias to allowed characters for windows login).

The **'custom home directory'** can be used to define a user's homeDirectory even if it can't be retrieved from the directory service. Enter the SERVER & PATH and if required "::username" as a wildcard for the user login name (sAMAccountName)

For Entra ID authentication, a token is used. If the Entra ID configuration changes (e.g., permissions), you can press [Reset Entra ID Token] to obtain a new one. You can also press [Check Entra ID Token] to view the assigned permissions and the token's expiration time (the token is automatically renewed).

9.1.7.6 Domains - Default user

Here you can define the user settings for newly imported users from this domain.

User import		New Control Controls Control Co. 192	(66440)

	Fax quota:		Pages

9.2 DEVICES

The devices menu contains all data and settings related to printing hardware (Toshiba e-BRIDGE Next and e-BRIDGE eSF devices) and the settings for mobile printing.

9.2.1 Virtual IPP-Queues

A virtual IPP-Queue in e-FOLLOW.cloud is used to receive print jobs from Client PCs or mobile devices and store these jobs for a later release.

There is No hardware (printer or MFP) assigned to a virtual queue.

If a client is printing to a virtual IPP-Queue

- △ The print jobs are held in e-FOLLOW.cloud internal spooling system
- The spool files are transferred and stored encrypted
- △ Jobs can be released at any MFP

This icon indicates a **virtual IPP queue** in e-FOLLOW.cloud

9.2.1.1 Adding virtual IPP-Queues

To add a virtual IPP queue simply enter a name for the queue. The URL prefix is fix and cannot be changed.

Add IPP queue	×
Queue name: VIPP	
[Cancel] add	

[1] Clicking to [IPP URLs] will show the IPPS URL for this virtual queue.

Q Sea	arch queue I_Z^A	Virtual IPP queue [IPP URLs]	iguration]
	e-follow.cloud (3 Jobs)	SELECT REFRESH: ON FILTER: OFF MODIFY	· ·
	PP (IPP URLs for selected qu	Jene	×
	I IPP (5:1. <mark>:</mark> 0
	External IPPS URL https	:://ipp-cs-test.test.e-follow.cloud:443/e-follow.cloud [copy url]	
	F IPP (ov	5:10:3
	C C C C C C C C C C C C C C C C C C C	ОК	

Share the full URL [2] to the users so they can create an IPP port on their clients that points to this e-FOLLOW.cloud virtual IPP queue.

Make sure the *Internet printing client* is installed on the client PC. Else users cannot connect to the URL.

For Windows clients e-FOLLOW.cloud provides a convinient **IppInstaller** that allows users to simply install the IPP printer on their client – or Administrators to roll out the IPP printer to all clients.

9.2.1.2 Virtual queue properties

Virtual queues in e-FOLLOW.cloud are used to perform 'pull printing' or 'secure print release'. So instead of forwarding the job to the destination printer e-FOLLOW.cloud moves the jobs to an internal spooler and keeps the jobs until they are

- released by a user, or
- deleted due to a rule, by the user himself or by the administrator

The **Auto-delete** option will remove jobs that have not been released after the time defined by the administrator.

The virtual queue view shows all jobs that are currently spooled. Clicking to the job's row will show it's details.

Desument name	Microsoft Word - e-FOLLOW.cloud-Operator Manual EN 5.5.0.docx

Print settings for printing at Tos	shiba MFPs via the e-F	OLLOW.cloud a	рр	
Drawer		draw	er3	
Paper size		a3		
Faper 3ize		45		
Paper type		trans	parency	
Scaling type		fill		
Settings for converting images 1	to PDF print jobs			
	mages	A4		
Standard paper size for converting	iniages			

Virtual Queues can be used to receive print jobs by User Portal, Email Print or Mobile Print.

For these jobs the **drawer**, **paper size**, **paper type** and **scaling type** settings can be changed at printing by the e-FOLLOW cloud App.

In order to enable the user to print on specific drawers or with special settings, you can create several virtual queues with appropriate names.

If the user uploads images to a Virtual Queue it will be converted to a PDF print job. With the **setting for converting images to PDF print jobs** it can determined which paper format will be used for the PDF print job.

General notes for Virtual Queues:

In case the PopUp status is different from 'None' or 'Closed' the job cannot be released because e-FOLLOW.cloud is waiting for the client PopUp to be confirmed.

Q Search queue	Virtual IPP queue [IPP URLs] [Drawer and paper preconfiguration] Auto-delete jobs that have not been printed after 24 hours V	
D ipp (12 Jobs)	SELECT REFRESH: ON FILTER: OFF MODIFY

			Virtual queues:	chrome_ipp client_test Drawer1	[1]
				[+]	[-]

9.2.2.2.1 General Settings

The settings in the General-Tab allow modifying the description and the virtual queue settings.

[1] Virtual queues:

Here you can add / remove virtual queues for that device.

When a user is logging in to that MFP e-

FOLLOW.cloud will check these virtual queues for print jobs for that user and add them to the print release list.

[2] Log Data Privacy Setting

Here you can see the setting, which was set by the auto configuration (Settings \rightarrow General \rightarrow Auto configuration). It controlls if job data from the MFP should be stored for accounting or not. Beside from this there are additional settings at Settings \rightarrow General \rightarrow Data protection.

• Store

Job accounting is enabled for e-BRIDGE devices.

• Not to Store No job accounting for e-BRIDGE devices.

[3] Name for Report

Unique device name for all job records for reporting. When the **Name for reports** is changed, all records are automatically updated.

[4] Sender email

Has priority over the email address of the user. Is requested by the MFP at login.

Hint

Checking the Last Login / Last transaction entries shows if the app and the subscriptions are working properly.

9.2.2.2.2 Quotas

e-FOLLOW.cloud allows to control the usage of devices by setting quotas for color, prints, copies, scans and faxes.

Quotas are only checked at user login at the MFP. They are not used to interupt jobs. Therefore it is possible for users to have negative quotas.

103 CNLH59919	General	v
□ 112 CFLE02008	Quotas	^
□ 116 CSCP40979	Use quotas 🍞	
our our	Total quota:	Pages
	Color quota:	500 Pages
	Print quota:	Pages
	Copy quota:	Pages
	Scan quota:	Pages
	Fax quota:	Pages
	Card login	×

To enable device quotas, check the "Use quotas" button.

You now can individually enable the different quotas and enter the appropriate page numbers. Quotas that are unchecked allow unlimited use.

Attention

Quotas can also be set for Departments and Users. So it might happen that even if the user still has e.g. color quota available he can't do color prints or copies if the color quota of his department or the color quota of the device is used up.

Quotas are only checked at user login at the MFP. They are not used to interupt jobs. Therefore it is possible for users to have negative quotas.

9.2.2.2.3 Card login

Here you can modify the settings that are related to card reader usage.

Card reader profile:

reader profiles are used to convert the strings read from a card. Reader Profiles can be created in -> SETTINGS -> Reader profiles

Card login	^
Card reader profile	8char 💙
Allow card self assignment	
Show unknown card IDs on the panel	
Allow card self assignment after login	
Show PIN field first	

Show unknown card IDs on panel:

this defines if the IDs of unknown cards are shown in clear on the device panel.

Allow card self-association:

if enabled this function will allow users to assign unknown card IDs to their account by entering their user credentials (username & password)

Allow card self-association after login

This will enable the option to self-associate a card from the Selection screen or print job list after the user has logged in.

Show PIN filed first

If enabled the user will be prompted with the PIN-Authentication first (instead of username & password) when associating a new card to his account.

9.2.2.2.4 EWB settings

Here you can modify the EWB appearance.

EWB mode	e-BRIDGE N (1024x600
Display mode (only e-BRIDGE Next)	dark 🗸

EWB mode

Here you can check in which mode the websites for the device EWB is displayed.

Display mode

For e-BRIDGE Next device the display mode of the e-FOLLOW.cloud application can be switched between dark-mode (default) and bright-mode.

9.2.2.2.5 Print settings

The settings in this section will have impact on the handling and release of print jobs.

QuickPrint:

If this function is enabled all print jobs of the user (also TeamPrint jobs) will be sent to the device immediately after login.

Attention

Users are not able to individually select jobs for printing when QuickPrint is enabled.

Notify user if QuickPrint fails:

In case one or more jobs could not be printed -e.g. due to missing permission or quota - the user will be notified by email.

Keep print jobs after printing for reprint:

Print settings	^
Note: The priority of the print settings is User->Department->Device	
Print all jobs immediately after login ("QuickPrint") 🝞	
Notify user if "QuickPrint" failed	
Keep print jobs after printing for reprint	
Show "Keep print jobs" option in job list	
Show print and keep button	
Force duplex printing	
Enable duplex printing by default	
Enable simplex printing by default	
Force black & white printing	
Enable black & white printing by default	
Hide color jobs if no color rights	
Show staple (Top left, 2 staples left). (Is set automatically)	

If enabled print jobs will not be deleted after printing. They will be kept in the virtual queue so they can be reprinted at a later time.

Show "Keep print jobs" option in job list:

If this option is enabled, the user can select for each job if it shall be kept for reprinting or immediately deleted after printing. A flag in the job list is accessible for each job.

Show print and keep button

If this option is enabled an additional print & keep button will be shown below the print job list. Releasing jobs by pressing this button will force the keep job for reprint option – independent of the individual print job settings.

Force duplex printing / black & white printing / erasable blue printing:

These options allow the administrator to force printing of each job in duplex and/or black & white / erasable blue.

Attention

If enabled it is impossible for users to print documents in simplex mode or in color on this device.

Enable duplex / simplex / black & white printing by default

In case the Force duplex, Force black & white is set to off, you can configure if as default these settings (duplex, simplex, b&w / erasable blue) are enabled when the user is logging in. In contrast to the "Force" -settings, these can be changed by the users.

Show staple

When the device is equipped with a staple unit, stapling options (top left & 2 staples left) are added to the job details settings in EWB.

This is only an information and cannot be switched on/off. If none of the options is selected in job details, the original stapling settings as set via printer driver are valid.

Hide color jobs if no color rights

If enabled, color jobs will not appear in the job list if the user has no permission to print color on this device. Else color jobs will be printed in BW.

9.2.2.2.6 Consumables

Consumables			^		
Last update:	26.10.2015 10:41:20				
Toner levels					
Yellow		100%

9.2.3.2.1 General Settings

The settings in the General-Tab allow modifying the description, name for reports, location, sender email and the virtual queue settings.

[1] Sender email:

Here you can define a sender email-address for this device. If left blank the current user's email address will be set as from-address.

[2] Virtual queues:

Here you can add / remove virtual queues for that device.

[3] Anonymous print:

This option allows printing of jobs that do not have a PJL header referring to the job owner. The printer will see this job as 'anonymous' and therefore cannot be accounted for the real job owner. By default, e-FOLLOW.cloud will deny printing these kind of jobs.

Attention

If you allow Anonymous print the jobs will not be accounted / charged to a user.

[Permissions]

Operator Manual

This leads you to the permission settings page as described above. (see Permissions)

9.2.3.2.2 Quotas

e-FOLLOW.cloud allows to control the usage of devices by setting quotas for color, prints, copies, scans and faxes.

To enable device quotas, check the "Use quotas" button.

You now can individually enable the different quotas and enter the appropriate page numbers. Quotas that are unchecked allow unlimited use.

Quo	tas	^
U	se quotas 🕐	
Т	otal quota:	200 Pages
С	olor quota:	50 Pages
P	rint quota:	Pages
C	opy quota:	Pages
S	can quota:	Pages
Fa	ax quota:	Pages

Attention

Quotas can also be set for Departments and Users. So it might happen that even if the user still has e.g. color quota available he can't do color prints or copies if the color quota of his department or the color quota of the device is used up.

Quotas are only checked at user login at the MFP. They are not used to interupt jobs. Therefore it is possible for users to have negative quotas.

9.2.3.2.3 Card login

Here you can modify the settings that are related to card reader usage.

Card reader profile:

reader profiles are used to convert the strings read from a card. Reader Profiles can be created in -> SETTINGS -> Reader profiles

Allow card self-association

if enabled this function will allow users to assign unknown card IDs to their account by entering their user credentials (e.g. username & password)

Show unknown card IDs in the panel

If enabled the card ID of a new unknown card is show in clear on the panel during the card selfassociation process. Else the card IDs are starred out.

Show PIN filed first

If enabled the user will be prompted with the PIN-Authentication first (instead of username & password) when associating a new card to his account.

9.2.3.2.4 Guest login

e-FOLLOW.cloud allows users that do not have an account to use the eSF devices. Therefore, a special Guest Login can be enabled.

Enable guest login: here you can eneable / disable the guest login option

User for guest login: select a user that is used when a guest is logging in. To assign transaction and apply permission or quotas a specific user must be selected as 'guest user'.

Guest login		^
Enable guest login:		
User for guest login:	a	[change]
Guest screen first:

[Copy settings to all printers]		

e-FOLLOW

LOGIN

Print settinas

Free Access

LOGIN

Free Access

It is recommended to create an internal user (e.g. 'guest') that is used when logging in as guest. If required, you can assign individual guest users to each eSF device.

e-FOLLOW

Guest screen first: if enabled a large 'guest button' is shown at the login screen.

If users need/want to login to their account they simply swipe their card or press "LOGIN" to switch to the login screen,

Guest button text: here you can modify the text for the guest button (e.g. Free Access)

[Copy settings to all printers]

Pressing this link will copy the current guest login settings to all Toshiba eSF devices.

9.2.3.2.5 Print settings

The settings in this section will have impact on the handling and release of print jobs.

QuickPrint:

If this function is enabled all print jobs of the user (also TeamPrint jobs) will be sent to the device immediately after login.

Attention

Users are not able to individually select jobs for printing when QuickPrint is enabled.

Notify user if QuickPrint fails:

In case one or more jobs could not be printed – e.g. due to missing permission or quota – the user will be notified by email.

Note: The priority of the print settings is User->Department->Device	
Print all jobs immediately after login ("QuickPrint") 🍞	
Notify user if "QuickPrint" failed	
Skip blank joblist	
Keep print jobs after printing for reprint	
Show "Keep print jobs" option in job list	
Force duplex printing	
Enable duplex printing by default	
Enable simplex printing by default	
Force black & white printing	
Enable black & white printing by default	
Hide color jobs if no color rights	

Skip blank job list

If enabled, the joblist will not be shown after login if there are not print jobs pending on the server. The user will be directly lead to the device home screen instead.

Keep print jobs after printing for reprint:

If enabled print jobs will not be deleted after printing. They will be kept in the virtual queue so they can be reprinted at a later time.

Show "Keep print jobs" option in job list:

If this option is enabled, the user can select for each job if it shall be kept for reprinting or immediately deleted after printing. A flag in the job list is accessible for each job.

Force duplex printing / black & white printing:

These options allow the administrator to force printing of each job in duplex and/or black & white / erasable blue.

Attention

If enabled it is impossible for users to print documents in simplex mode or in color on this device.

Enable duplex / simplex / black & white printing by default

In case the Force duplex, Force black & white option is set to off, you can configure if as default setting. So Duplex / Simplex / B&W is enabled when the user is logging in. In contrast to the "Force.." setting, this can be changed back to color by the users.

Hide color jobs if no color rights

If enabled, color jobs will not appear in the job list if the user has no permission to print color on this device. Else color jobs will be printed in BW.

9.2.3.2.6 Consumables

Here you can see the status of the device's toner and consumables level.

Consumables	^
Last update:	09.07.2020 11:17:56
Black	77%
Imaging Unit	94%
Maintenance Kit	100%

9.2.3.3 MANAGE Toshiba eSF devices

When selecting one or multiple Toshiba devices the MANAGE option gets available.

ADD	SELECT	MANAGE	MODIFY
Q Searc	ch device	Delete sele	ected devices

You now have the possibility to

 \bigcirc remove the selected devices from the list

9.2.3.4 MODIFY Toshiba eSF devices

When selecting one or multiple Toshiba devices the **MODIFY** option gets available. These options are very helpful to perform modifications for multiple devices in one single step.

Change queues

You now have the possibility to assign virtual queues to the selected devices

or to remove all assigned virtual queues from the selected devices.

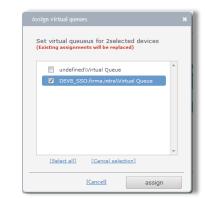

Assign virtual queues

This option allows assigning one or multiple virtual queue/s to the selected Toshiba devices in one step.

Attention

this action will replace existing assignments of virtual queues.

Remove assigned virtual queues

This option will remove all assigned virtual queues from the selected Toshiba devices.

Remove assignment of queues	
Are you sure to remove the assignment of virtual queues from 2 selected devices?	
[Cancel] remove	

Attention

Make sure to assign at least one virtual queue to each Toshiba device. Else it will not be possible to release print jobs.

Set quotas

Here you can set quotas for the selected Toshiba devices. If you do not wish to use quotas for a certain function - e.g. faxing, scanning - you can disable the use of quotas by clicking to [disable].

This will make the selected function 'unlimited'.

Quotas are only checked at user login at the MFP. They are not used to interupt jobs. Therefore it is possible for users to have negative quotas.

	×
Set prices for 3 selected deivices	
One color page (small):	0,15 €
One color page (large):	0,29 €
One dual-color page (small):	0,10 €
One dual-color page (large):	0,15 €

			[Cancel] assign	

9.2.3.5 Updating eSF – App

By default, the e-FOLLOW.cloud instance contains the latest eSF-App in \rightarrow Settings \rightarrow General \rightarrow Instructions & Configuration

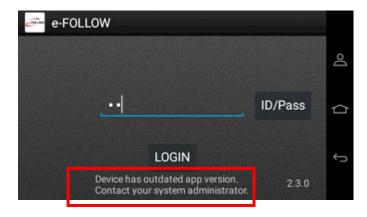

The current version of the installed App is shown on the login screen.

If the version number does not end with _C (like 2.4.8_C) the app must be renewed by logging out or MFP restart.

To guarantee unrestricted functionality it is mandatory that the latest eSF App version is installed on the devices. If a deprecated version of the e-FOLLOW.cloud eSF App is installed on the MFP the users are not allowed to login.

A corresponding message is shown on the device when trying to login.

In the e-FOLLOW.cloud Event Log you will also find a corresponding Warning.

9.2.4 Mobile print

e-FOLLOW.cloud allows users to send documents for printing via email from any (mobile) device. Most common office file formats, images and PDF are supported.

9.2.4.1 E-Mail printing

E-mail printing is very convenient way to send documents for printing as almost every device with an internet or WLAN connection is capable to send out emails.

FOLLOW				🕸 🕞 🕻 Logout
cloud	ADD REMOVE

			Enabled	
Version: 5.6.0 RC07				

Therefore, e-FOLLOW.cloud can constantly check one or more email accounts of different type (IMAP, POP3, Exchange or Office 365).

e-FOLLOW.cloud separates the attachments and processes them into a print job. All common file formats are supported.

PDF	PDF
Words:	DOC, DOCX, XML, RTF, HTML, XHTML, MHTML, ODT, XPS, SWF, TXT, EPUB
Cells:	XLS, XLSX, XLSM, XLSB, ODS, CSV
Slides:	PPT, POT, PPS, PPTX, POTX, PPSX, ODP, PPTM
Images:	GIF, JPG, JPEG, PNG, TIFF, TIF, BMP, EMF, EXIF, ICO, ICON, WMF

If Anonymous mode is disabled e-FOLLOW.cloud accepts only emails from known senders. So the sender's email address must be identical to one of the email addresses stored in the user database. If a sender address is unknown the email will not be processed and deleted.

Click to **ADD** to add a new email account to be monitored by e-FOLLOW.cloud.

Enter a name for this account and d select the account type (IMAP, POP3, Exchange or Office 365).

Add new m	nail server configuration	×
Name:]
Protocol:	IMAP 🗸	
	IMAP POP3	
[Cancel]	Exchange Office 365	

Depending the account type you need to enter the account credentials:

	Print to queue Min. size for images Max. mail size Validation token ⑦ Additionally print mail text E-mail Notification Send PIN with notification	e-follow.cloud [2] 5 KB 20 MB [TOKEN]
	Anonymous printing Enabled Use existing user account Create new user ? PIN Length	

[1] - IMAP/POP3

User	Enter the username for this email account
Password	Enter the password to login to the account
Hostname	Enter the hostname or IP address of the email server
Port	Port number of the server (the default values for IMAP and POP3
	usually work fine)
Use SSL	Enable to connect via secure SSL connection
Last error message	If an error while retrieving email occurs, the error message is shown
	here.

[3] - Exchange

The settings for an exchange account are different from the above.

exchange	exchange [change] Enabled	[3]
0365	Protocol	Exchange 💙
print	User	test
print_gmail_imap	Password	•••••
nint and and	URL	https://XXXXXXXXXXXXXXXXX/EWS/Exchange.asm
print_gmail_pop3	Domain name (FQDN)	csvs.local
public_pop	[Test]	
Test	Last error message	-

User	Enter the username for this email account
Password	Enter the password to login to the account
URL	Enter the correct URL for the web access of your Exchange server
Domain	Enter the name of your exchange's domain

To determine the correct **URL for the Exchange Web Service** (EWS) of your server you may logon to your exchange server and enter below power-shell command.

Get-WebServicesVirtualDirectory |Select name, *url* | fl

[2] - The following settings determine the processing and routing of the mails.

Print to queue	This is the queue the processed document will be sent to. By default the (first) virtual queue is pre-selected
Min. size for images Max. mail size	This value avoids print out of small images like logos or icons As processing of jobs needs some resources the size of emails
Validation token	can be limited. This is a security feature to avoid SPAM. If you enter any string here all emails´ subject must begin with this string.
Additionally print text	If enabled not only the attachment will be processed but also the email (body) itself.
E-Mail notification	If enabled the sender will receive a confirmation email with the status of the transmitted job.
Send PIN with notification	If enabled the mail sent will contain the user's login PIN

Changing the output queue from a virtual queue to a direct queue will lead to an immediate printout of the documents.

9.2.4.2 Office 365 (modern Auth.)

e-FOLLOW.cloud supports fetching mails from an Office365 account. The high Office365 security level (modern Auth.) requires some additional configuration.

	0365 [change]

Make sure the Email-Account is licensed

9.2.4.3 Anonymous printing

By default, e-FOLLOW.cloud discards emails from unknown senders. To allow emails from anonymous users being sent to this email account, e-FOLLOW.cloud offers two different methods of handling emails from unknown senders.

Use a common user account

All emails from unknown senders will be assigned to a specific account.

If the jobs will be held in a virtual queue, print jobs from anonymous senders need to be assigned to a user account for a later release.

It is recommended to create a specific account for anonymous guest prints. This allows to disclose it's login credentials / PIN to guests and set a (daily?) limit to it.

Anonymous printing		
Enabled		
Use existing user account Account for printing	0001.test@control-systems.de	[change]
Create new user ?		

Of course, any other user account can be selected as well.

Create new user account

This option will create a new 'internal' user account for each email received from an unknown sender.

Create new user 🍞	
PIN Length	4
Accounting type	None 🗸
Delete users automatically	
	after 0 days 1 hours
Allow PIN login in Mobile App	•

The account name (login name) and full name will be set to the **email address**. The account password and login PIN will be generated by e-FOLLOW.cloud according the PIN length setting.

You can also define the accounting mode for these new accounts and a limit or total quota. This might be useful to avoid unlimited use of your printers for guests.

The user will be informed about the creation of his new account be email.

Notification vor 1 Minute um 9:21 von e-FOLLOW>	
Betreff:Tickets 1234	[1]
and is assigned to you It will be processed in	Ily received from your E-Mail address: <u>u</u> :om in new account: <u>uli</u> <u>m</u> imediately and sent to this virtual queue: P005 ssigned to your account for print release: 7745
Sent by Toshiba e-FO	LLOW

Here the user can find his

- Username/login: email address
- Password / Login PIN: randomly created by e-FOLLOW.cloud
- Queue / Printer to where the job will be processed.

[1] It is recommended to secure the email account for anonymous users by using a validation token. This will ensure that e-FOLLOW.cloud will only accept emails when the subject contains this token.

Validation token ?	1234

To avoid uncontrolled number of 'anonymous' user accounts an expiry period can be defined for these accounts. Once expired the account and pending print jobs will be deleted automatically.

i

9.3 **REPORT**

e-FOLLOW.cloud provides a numerous number of standard reports. By simply selecting the desired report and it's parameters the Operator has quick access to all transaction data stored in the e-FOLLOW.cloud database.

9.3.1 Reports

This menu contains the powerful built in report generator. e-FOLLOW.cloud offers a row of predefined report templates for user-, department- and printer-based reports [1].

		* 🗇 🕻 Logout
MANAGEMENT User list Departments Permissions Projects	ADD REMOVE CPP2 1 > User reports [1] > Department reports ~ Printer reports	Description Details (transaction list) of the printer/device activities per user [4] Group by Device V Username V - V

by project - det		Create now:					
by job tupo _ cum	00000	II room	r	F			

You can ADD a new template and configure it's settings or COPY the current 'active' template with all it's settings into a customized report template.

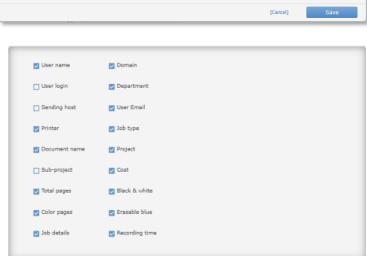

[3] Filter

When you have selected the template you can specify the time period for the report, specific users, Departments, printers, projects etc. to filter the data for the report.

You can also filter on paper size (e.g. only jobs that contain A3) or on color-/duplex-usage, or job type.

	Template	
User Department	Last quarter ¥ From	
Printer/device	01.04.2021 To	
Project Format	30.06.2021	
Job type		
Color usage Duplex		
Columns		

Columns allows to select / deselect the data/columns that are taken to create the reports.

[4] Grouped by / Sort order

According the selected template data can be grouped and the sort field and order can be selected. Click to 1th to select the sort order ascending or descending.

[5] Create now:

Confirm the template you have selected by clicking to one if the [.html][.pdf] or [.csv] buttons. The report will be generated according your selection, filters, etc.

9.3.1.1 Eco reports

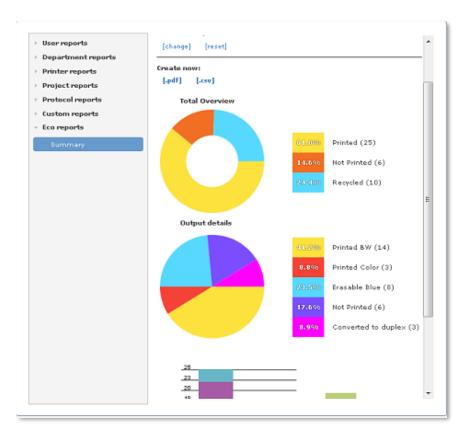

e-FOLLOW.cloud is not just tracking the number of pages printed, but also the sheets of paper that have been saved due to jobs not being printed or converted to duplex.

Reasons for 'saved' paper may be:

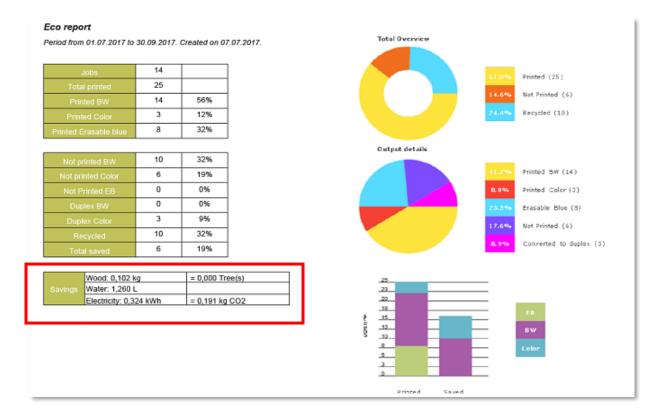

Job deleted by user	User don't need the job anymore and deletes it from the job list at
	the MFP
Job deleted by system	Job is timed out and automatically deleted from the virtual queue
Job deleted by rule	The job is deleted due to a rule set in e-FOLLOW.cloud – e.g. no
	jobs > 100 pages on this device
Job converted to duplex	Jobs that are converted to duplex by a rule or policy will save 50% of
	the sheets

Additionally, e-FOLLOW.cloud is also tracking the number of sheets of paper that have been recycled (erased) for re-use by e-STUDIO3508LP/4508LP/5008 devices.

The report gives a brief overview of the pages printed, not printed, converted to duplex and recycled.

By clicking to the [.pdf] link a PDF file is generated containing the detailed eco-statistics and graphs.

Besides the paper saving it also shows the savings for wood, water, electricity and CO2.

i

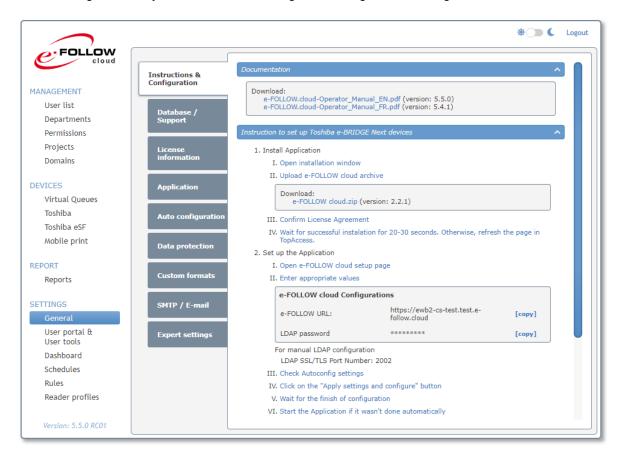

The calculation is based on below parameters and can easily be adjusted in SETTINGS \rightarrow General \rightarrow Expert Settings in terms the basic input values are different in your region.

Expert settings	DirectPrintingCheckDeviceErrorCodes () DirectPrintingCheckDeviceSnmp (false) EbxLargeFormats (A3,Tabloid,AnsiC,AnsiD,AnsiE) EbxOnlyPrintDirectly (false)	A3,Tabloid,AnsiC,AnsiD,An
	EbxSessionLifetimeHours (48) EbxSessionTimeout (3600000)	48 300000
	EcoValueElectricity (0,054) EcoValueKGC02 (0,0059)	0,054
	EcoValueWater (0,21) EcoValueWood (0,017)	0,21 0,017

name	default	description
EcoValueWood	0,017	Kg wood used to produce 1 sheet of paper (80g/sq.m size A4)
EcoValueWater	0,21	liter of water used to produce 1 sheet of paper (80g/sq.m size A4)
EcoValueElectricity	0,054	Kw/h electricity used to produce 1 sheet of paper (80g/sq.m size A4)
EcoValueKGC02	0,0059	Kg CO_2 emitted to produce 1 sheet of paper (80g/sq.m size A4)

9.4 SETTINGS

In the settings section you have access to all global configuration settings in e-FOLLOW.cloud.

9.4.1 General

Here you find all configurations related to the application itself.

9.4.1.1 Instructions & Configuration

Here you find all relevant data, settings and files to successfully connect your e-BRIDGE and eSFdevices to e-FOLLOW.cloud.

9.4.1.1.1 Instruction to set up Toshiba e-BRIDGE Next devices

This section leads you step by step setting up your e-BRIDGE based devices. Screenshots will help you to find the menus in TopAccess

e-FOLLOW cloud Configurations					
e-FOLLOW URL:	https://ewb2-cs-test.test.e- follow.cloud	[copy]			
LDAP password	*******	[copy]			

The e-FOLLOW cloud Configurations box shows your specific custom data required to configure the App in TopAccess.

9.4.1.1.2 Instruction to set up Toshiba eSF devices

This section leads you step by step setting up your eSF-based Toshiba devices. Screenshots will help you to find the menus in the device Web-Management.

	Instruction to set up Toshiba eSF devices	^
e-FOLLOW.cloud provides the latest version of the embedded eSF-application	1. Install e-FOLLOW App I. Open installation dialog II. Upload e-FOLLOW installation file	
and your custom specific server URL that is required to connect the devices to e- FOLLOW.cloud.	Download: efollow.fls (version: 2.4.8) 2. Configure e-FOLLOW App I. Open App configuration page II. Set up Application	
	e-FOLLOW Configurations	
	Server URL: https://esf-cs-test.test.e- follow.cloud [copy]	

9.4.1.1.3 Instruction to set up Windows PopUp Here you will find the download and configurations for the e-FOLLOW PopUp for Windows clients.

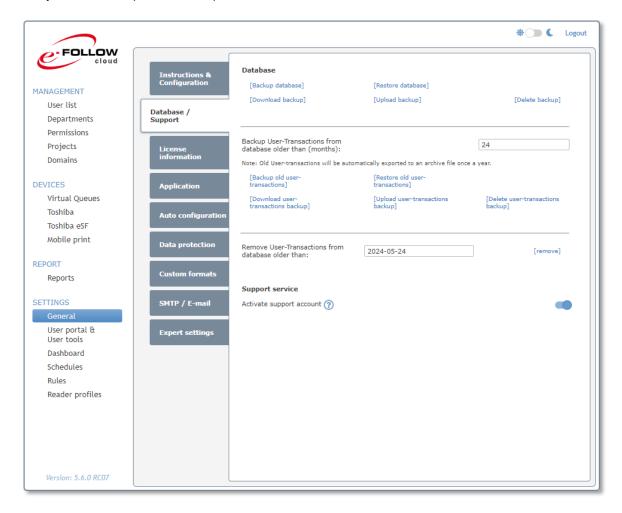

Download: e-FOLLOW PopUp.exe (version: 2.6.0) Windows PopUp configuration

i

The executable e-FOLLOW PopUp.exe comes with an integrated configuration. More configuration for the PopUp can be fould at the General \rightarrow Popup section.

9.4.1.2 Database / Support

Here you can backup and clean up the database.

9.4.1.2.1 Backup database

[Backup database]

Will create a backup archive. By default, the filename is e-FOLLOW _TIMESTAMP. You can modify the filename before executing the backup.

Click to **OK** to start the backup process.

Please selec	t a name for the database backup.	
Filename:	e-follow_2024-05-24-09-46	
	[Cancel] Ok	
	[cancer] OK	

[Restore database]

Here you can restore a backup of your choice. You have access to all backup files - au backup-task or manualy generated

have access to all backup files backup-task or manualy generat	- auto-generated by a	Please select the restore backup.				
Select the backup to be restore	Hint: In this process, all unsaved data will be lost. To prevent data loss be sure that you don't need the current content or create a database backup. File: dbbackup_2022-06-23-13-00 (1.53 MB)

	[Cancel]	L	Jpload			

Restore database

[Delete backup]

This menu allows you to remove a backup file from your e-FOLLOW.cloud instance.

9.4.1.2.2 Backup User-Transactions

[Backup old user-transactions]

Will move old user-transactions (data records for reports) to a file. This can be used to clean up and reduce the amount of data at the user-

transactions. Note: These records will be removed from the database.

Backup User-Transactions from database older than (month): Here you can change the default period for the user-transaction backup of 24 month.

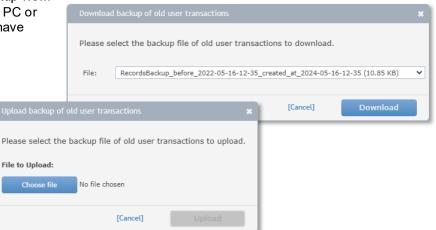

[Restore old user-transactions]

Will restore the deleted user-transaction from the selected file.

Please s	elect the restore user transactions backup.	
File:	RecordsBackup_before_2022-05-16-12-35_created_at_2024-05-16-12-35 (10.85 KB)	~
	[Cancel] Ok	

[Download user-transaction backup] [Upload user-transaction backup

Here you can download a backup from e-FOLLOW.cloud to your local PC or upload a backup file that you have previously downloaded.

[Delete user-transaction backup]

This menu allows you to remove a backup file from your e-FOLLOW.cloud instance.

Remove records older than:

This allows to clean up your transaction database by removing records 'older than...'

[Backup database] [Restore database]							
Remove records older than:	2018-1	2-31				[ren	10ve]
	0	C	ecem	ber :	2018		0
Directory service		т.,		ть	E.	C -	c
Name [e-FOLLOW]	Mo	Tu	We	Th	Fr	Sa	Su
						1	2
earch base [dc=e-follow]	3	4	5	6	7	8	9

9.4.1.4 Application

The application tab allows changing some basic configuration.

9.4.1.4.1 Logfile

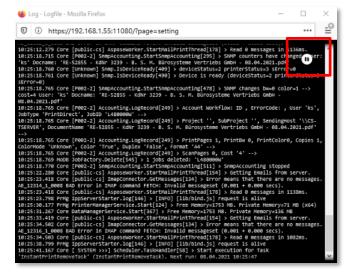

Here you can [Show] (live mode) the current log file, open it in a new window , [Download current] or

[Download all] Logfiles.

Use the pause/play button to stop / start the live viewing.

The **[Download]** options will allow to download the current or all available log files.

Additional you can also Open/Download the log files from PrinterManager and IppServer.

9.4.1.4.2 General

New GUI

Here you can switch the appearance of e-FOLLOW.cloud management between 'classic' and a newer frameless design.

'Operator' password

Click to [Change password] to change the password for the user 'Operator'. Enter the current and the new password.

Time Zone

Here you can select your current time zone. This has impact on the time stamp of print jobs, transactions and log files.

Time Zone 🕜	(UTC+01:00) Amste	~
Language	English	~

Language

Select the language from the pull-down.

e-FOLLOW.cloud is designed to support up to 36 languages. Use the link **[add or customize language]** to modify the text or add new language.

Add or customise l	anguage			×			
	To add or customize a language, a language file must be created. This language file can then be downloaded, edited and uploaded again.						
1. Select language	norsk - Norwegian	~	Create new language file				
2. Download languag	je file:						
lang_en.txt	[delete]						
lang_no.txt	[delete]						
2	15 11 61						
3. Upload e	dited language file						
			Close				

Steps to create a new language file:

- 1. Select your prefered language and click on [Create new language file]
- 2. Then you can download the language file template and modify it. Make sure to remove the leading #-signs else the modified string will not get effective.

lang_no.txt - Editor	_		×

3. Finally click on [Upload edited language file] and upload your new language file.

9.4.1.4.3 Login settings

Add new domain users to database automatically

If enabled, users will be added immediately to the e-FOLLOW.cloud user database after successful authentication when printing or logging on to a Toshiba device. Else, new users will only be added while synchronizing.

Check user in domain at every login

If enabled and login is performed by card or PIN, e-FOLLOW.cloud checks if the user is still available/valid in the domain.

Synchronize department on user login

If enabled e-FOLLOW.cloud will check the user's department at each login. In case the user's department has changed it will be updated immediately in the e-FOLLOW.cloud database.

Ignore MFA for Azure Active Directory

If enabled Multi Factory Authentication will ignored for Azure Active Directory. Else you have to add your public IP address range of your e-FOLLOW server to the trusted Ips at your Azure Active Directory (Microsoft Azure \rightarrow Azure Active Directory \rightarrow Security \rightarrow Conditional Access \rightarrow Named locations \rightarrow Configure multifactor authentication trusted IPs \rightarrow Skip multi-factor authentication for requests from federated users on my intranet).

9.4.1.4.4 Card assign

Card self-association overwrites existing Card Ids If enabled the user can associate a new card ID to his account. Any existing ID will be replaced by the new card ID.

Attention

In case 'Write new Card-IDs to A.D'. is enabled, e-FOLLOW.cloud will not only replace existing Card-IDs in its own database, but also in the user's account in the directory service (A.D.).

Write new Card-IDs to A.D.

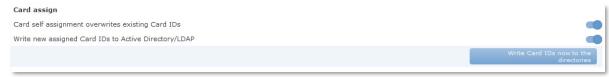

If enabled, e-FOLLOW.cloud can write new card ID's that are self-assigned by users back to the user's account in the directory service.

This presupposes following conditions

- The attribute for Card-ID is specified in domain settings
- The user specified in domain settings has the permission to write
- The user's Card-ID is not set in directory service (is blank) or
- the Above parameter "Card self-association overwrites existing Card IDs" must be switched ON.

Write Card-IDs now to the directories

Clicking to this link/button will immediately start writing the current card-IDs to the corresponding directory services of each user.

Make sure writing card-IDs to directories is enabled.

9.4.1.4.5 PIN

Write generated Pin to Active Directory/LDAP Here you can define that if a new PIN is generated for a user (by Import, Synch., UserPortal or Administrator), the PIN is written to the directory service attribute defined in 'domains'.

When writing the generated Pin to Active Directory/LDAP, overwrite existing pin If enabled, e-FOLLOW will overwrite an existing PIN in the corresponding attribute when a new PIN is generated. Else an existing PIN in the directory service will be kept unchanged.

Attention

In case overwriting is disabled, the user's PIN in e-FOLLOW and the PIN stored in the directory service may not match.

This presupposes following conditions

- The attribute for PIN is specified in domain settings
- The user specified in domain settings has the permission to write
- The user's PIN is not set in directory service (is blank) or
- the Above parameter "... overwrites existing PIN" must be switched ON.

Write PIN now to the directories

Pin Write generated Pin to Active Directory/LDAP When writing the generated Pin to Active Directory/LDAP, overwrite existing pin

Clicking to this link/button will immediately start writing the current PIN to the corresponding directory services of each user.

Make sure writing PINs to directories is enabled.

9.4.1.4.6 Print

Allow unknown users to print

IF enabled, users that do not exist in the domain or in the e-FOLLOW.cloud database can print anyway.

PJL user name has priority

This will force e-FOLLOW.cloud to check the print job's PJL header to extract the username (or alias) to map the job to the correct user account. This may be helpful if the printer is mapped under a different username or in SAP environments.

Show printed jobs which are waiting for accounting in the virtual queue job list (these jobs are displayed in blue)

10

If enabled jobs that are already printed will stay visible in the virtual queue list until e-FOLLOW.cloud receives the accounting information from the MFP

Don't create preview of print jobs

If enabled the preview images of the print jobs will not be created and cannot be viewed on the MFP panel or in Mobile App.

Prevent users to enable QuickPrint

If enabled the checkboxes "Print all jobs immediately after logging in." at Toshiba EWB screen and "Print all jobs immediately after login ("Quickprint")" at UserPortal→ACCOUNT→Settings screen will not be available for users.

9.4.1.4.7 Notifications

Send Notifications by email

if enabled e-FOLLOW.cloud will send notifications to users via email.

Show notifications via PopUp

If enabled e-FOLLOW.cloud will use the PopUp to show notifications to the user.

9.4.1.4.8 Toshiba

LDAP Password

Here you can modify the auto generated password for LDAP connections of the e-BRIDGE devices.

When changing the password, the LDAP settings at all e-BRIDGE MFPs needs to be updated acordingly.

Default display mode for new devices

Here you can select the display mode (dark or bright) that will be assigned to e-BRIDGE Next devices that are newly added to the device list.

User for accounting of system jobs / User for accounting of incoming faxes

Usually these types of jobs cannot be associated to a specific user and therefore do not appear in any reports.

If required, create an internal "system" user for assigning these job types.

Detect user from "Printope" print jobs and do accounting

In case the user is unknown (e.g. by an internal device error) the job will be printed as user 'Printope'. If 'Detect user...' is enabled these jobs can be accounted properly if the job's ID is known.

9.4.1.4.9 Printer drivers

e-FOLLOW.cloud provides a convenient method to deploy Virtual Queues to the client PCs via UserPortal. Therefore, a personalized IPPinstaller package is created for each user containing

Operator Manual

☐ Certificate

△ Driver properties

To provide different drivers that can be assigned to virtual queues, driver packages can be managed here. Clicking to [+] will open

the driver upload window.	Upload printer driver	-
Enter the driver's name and optionally a 'simple name' displayed to the users.	Choose printer driver and enter its name. If it there is already one with the same name, it will be replaced. Name * Name that will be displayed to user Zip-archive with driver files (.inf-file should be in the root) * Date: auswählen Keine Date: ausgewählt	
Select the driver package (.zip file) containing all driver files and .inf file and press upload .	[Cancet] upload	

e-FOLLOW.cloud will check the archive and add the driver to the list.

9.4.1.4.10 Mobile App

Allow PIN login

If enabled the option to login to the mobile app by using only the user's PIN is generally enabled. A switch to enable PIN login will appear on the mobile app login screen.

10:30	al ≎ ■)	10:30	
e.Foi	Low	e.Foli	ow
			PIN 🌔
User		PIN Number	
Password			
Remember credentials		Remember credentials	
Log in		Log in	
Change se	rver	Change server	
Test connec	tion	Test connection	

This feature then can be set individually for each user.

9.4.1.4.11 Other settings

Reset all Azure Active Directory tokens

Certain changes to Azure Active Directory will not take effect until a new token is issued. By default, tokens are automatically regenerated after 60 minutes. With the manual deletion of the token, you no longer have to wait for it.

Also reduce Total Quota for scan and fax jobs

By default (enabled) e-FOLLOW.cloud will reduce the total quota for scan and fax jobs. In case the total quota shall stay untouched for these types of jobs it can be switched off here. (Scan- and Faxquotas will still be reduced)

Custom Home Directory

Here you can enter / define the user's HomeDirectory. If – for example - scans shall be stored in a folder like <u>\\server\userData\scans\USERNAME</u> you can enter the path here. The wildcard **'::username'** will replace the actual user name logged in at the MFP.

In any case this Custom HomeDirectory will be used – even if it has been imported from A.D., LDAP or it has been entered manually.

Web session timeout

The operator will be auto logged out after this time of inactivity.

Log level

Here you can define the level of details stored in the e-FOLLOW.cloud log file.

- Verbose: log will contain detailed information
- Error: only errors will be logged

Log Filter

Here expressions can be entered to filter the log content. A separate log file **e-FOLLOW.cloud-DATE.filter.log** will be created containing only messages matching the filter.

This should only be set on request by support.

9.4.1.5 Use Radius Authentication

e-FOLLOW.cloud supports user authentication against a RADIUS server.

RADIUS authentication typically is used in environments where several domains or authentication servers shall be merged to one single point of authentication.

If enabled in **General – Application** the RADIUS authentication options get available.

			遼 🕞 🕻 🛛 Logout
Cloud MANAGEMENT	Instructions & Configuration	Use RADIUS Authentication IP address of primary server	
User list Departments Permissions	Database / Support	IP address of secondary server Authentication Port [1812]	1812

Toshiba eSF Mobile print REPORT	Data protection		
Reports	Custom formats		
General User portal & User tools	Expert settings		
Dashboard Schedules Rules	RADIUS Server		
Reader profiles			

Please request your administrator to obtain the details for the configuration of the RADIUS authentication service.

9.4.1.6 Auto configuration

At the auto configuration settings you can set up the configuration, which is downloaded and used at the e-FOLLOW.cloud App for e-BRIDGE devices.

PIN Code Authentication

If enabled, the default login screen at the Toshiba e-BRIDGE device will be the PIN code entry screen.

Minimum PIN Code Length

The minimum length for a valid PIN code.

Assign function key 1/2 with

Here you can define, which MFP function should be called when the corresponding hardware key is pressed.

Auto clear time

Here you can set the time for the automatic user logout.

If you enable the feature at

User list \rightarrow EWB/Print settings \rightarrow Automatic deletion of jobs (This will activate single print) \rightarrow At logout then the auto clear time should be changed to No Limit

Authentication failed print job/Raw Print Job

This option defines, what the MFP should do with print jobs from an unknown user and domain name/LDAP server.

Set this setting to "Print" if users should be allowed to print directly to the device. But this setting is not recommended because these jobs won't be accounted correctly. The MFP will assign jobs for unknown user to "printope", which are not accounted by default.

With the setting

General \rightarrow Application \rightarrow Toshiba \rightarrow User for accounting of system jobs you can set one user, to which these unknown jobs are assigned.

Card Authentication - Auto Change Login User

If activated, a card login can be carried out even if a user is currently logged in.

Card Authentication - Enable Guidance Screen

If enabled, at guidance screen is shown for card login.

Use EWB language settings

If enabled, the language of the EWB is used.

Confidential Settings - Log Data Privacy Setting

Here you can see the setting, which was set by the auto configuration (Settings \rightarrow General \rightarrow Auto configuration). It controlls if job data from the MFP should be stored for accounting or not. Beside from this there are additional settings at Settings \rightarrow General \rightarrow Data protection.

These settings are possible:

- Use MFPs' setting The setting from TopAccess→Administration→Setup→General→Confidentiality Setting is read and set at auto configuration.
- Not to Store

No job accounting for e-BRIDGE devices.

• Store Job accounting is enabled for e-BRIDGE devices.

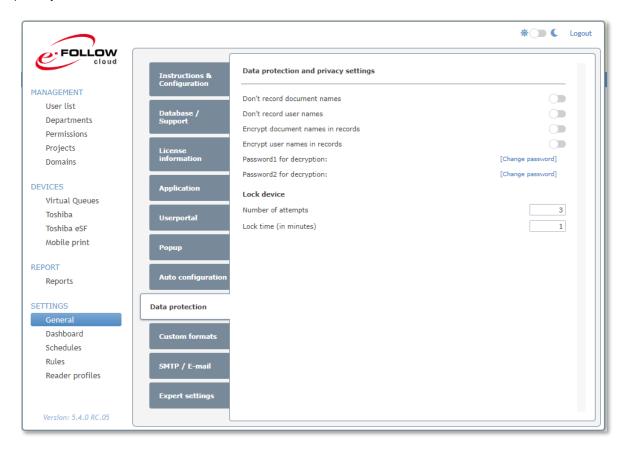

Keep foreign Subscribes for Toshiba devices

By default other event subscribes are removed when the e-FOLLOW.cloud App adds its event subscribes to prevent timeout errors.

In case the event subscribes to other services are needed, this option has to be enabled.

9.4.1.7 Data protection

e-FOLLOW.cloud provides some unique functions to ensure a maximum level of data protection and privacy of user data.

Don't record document names

If enabled the document names will not be recorded in the transaction database.

Don't record usernames

If enabled the usernames will not be recorded in the transaction database

Encrypt document names in records

If enabled, the document names will be stored encrypted in the transaction database

Encrypt user names in records

If enabled, the user names will be stored encrypted in the transaction database

Password1 for decryption:

Password 1 for the decryption of document names and user names when creating reports.

Password2 for decryption:

Password 2 for the decryption of document names and user names when creating reports.

Password 2 may be left blank.

The usage of two passwords allows performing a 2 factor authentication for the decryption of user names and document names.

Lock device

This will enable a security option against trying out credentials. If a user enters multiple invalid user credentials (username, username & password, PIN) reaching the *Number of attempts*, the device gets locked for the *Lock time*.

Locking of a device is also indicated in the device's General settings.

Enter the Hostname and port of your SMTP server.

In case SMTP authentication is required, enter the credentials of an account that is allowed to send emails via this server.

Use the E-mail settings to enter a From address: a Subject: an a signature.

Enter an **Admin e-mail address** that will receive administrator notifications e.g. in case of Maintenance is going to expire

The **default E-mail address domain** will be used if the user has no e-mail address assigned. e-FOLLOW.cloud will then try to send notifications to **'username'@'default_E-mail_address_domain'**

[test the SMTP and e-mail settings] Enter the sender and recipient and press Send test e-mail. e-FOLLOW.cloud	Test the SMTP and e-mail settings		
embedded will try to send a test email.	Recipient address me@domain.com Example text This is a test e-mail.		
Check the in-box of the recipient to make sure, settings are correct.	[Cancel] send		

9.4.1.10 Sending mails via Microsoft 365

You can use Microsoft 365 as an SMTP server to send out mails to users.

It is recommended to add a specific user that is used for authenticating against MS365.

Login to Microsoft 365 admin center and select Active Users.

9.4.2.1.1 User portal settings

Use User portal

This will enable/disable the general availability of the portal to the users

New GUI (framless)

This will enable/disable the new frameless design for the UserPortal.

Address

This shows the URL to access the UserPortal of your e-FOLLOW.cloud instance. Share this URL to all users that shall have access to the UserPortal.

Allow file upload

IF enabled the upload option gets available for the users.

Upload queues

Add one (or multiple) **upload queues** the users can select as destination. This can be virtual queues (for a later release) or direct queues (for instant print job release)

e-follow.cloud		
	[+]	[-]

9.4.2.1.2 Connection

Session Timeout

This defines the time after a user session is close automatically when there is no activity.

9.4.2.1.3 PIN self-assignment

Allow PIN self-assignment

If enabled the option to self-assign a PIN is available to the users.

PIN length

Defines the number of digits for the new PINs

Due to security reasons (trying/finding other user's PINs) the user cannot select a new PIN by himself. Instead the system will randomly create an available new PIN.

9.4.2.1.4 IPP queues

Туре	Name	In	staller 🕊		Details		
IPP	e-follow.cloud	IppInstaller.exe (preconfigured)	Archive (.zip)	Windows Installer (.msi)	Show details		
Details * Use personalized URLs below to add IPP printers to your system.

				ок			

Show personalized IPP-Printers

This option enables the download for personalized IPP-Installer package that contains the certificate, the personalized URL and the driver files.

Show details

If enabled the option to display the personalized URL for manual installation.

Installation helper as IppInstaller.exe with integrated configuration

If enabled the button with lppInstaller.exe (preconfigured) will be show. When this executable is started it will automatically download all necessary files and install the IPP printer.

Installation helper as ZIP archive

If enabled the button with Archive (.zip) will be show. This archive will contain all necessary files to install the IPP printer.

Installation helper as MSI installer

If enabled the button with Windows Installer (.msi) will be show. This installer contains all necessary files and will install the IPP printer. When the user uninstalls it, also the IPP printer will be uninstalled.

Installation helper silent mode

This option will turn on silent mode for all installation helpers.

Default Printer driver

Here you can select the default printer driver that will be chosen for building the lppInstaller packages.

Г		Installation helper silent mode					
L	Userportal	Default printer driver	TOSHIBA V4 Printer Driver v10.70 x64	~			
	Рорир	Printer driver for particular queue	Select one queue from list below	\sim			
	· opup	Select IPP queues:	e-follow.cloud				
	Auto configuration						
	Data protection						
_			[+]	[-]			

To assign a different driver to an IPP queue, simply select the queue in the list and assign the **Printer driver for particular queue**

Select IPP queues

Click to [+] to add IPP queues that shall be published as personalized IPP-Installer packages via the user portal.

9.4.2.1.5 Include printer properties template with lppInstaller package This is a powerful method of configuring the capabilities and equipment of a virtual IPP queue.

A

This works only for Toshiba V4 printer driver!

Click to [change] to start the procedure for creating a printer property template.

Manage printer's properties template file	×
How to export printer's properties Setup printer's properties. Enter printer's name in the field below. Copy the resulting command and execute it in powershell.	
<pre>\$(Get-PrinterProperty -PrinterName "Printer's Name" -PropertyName "ToshibaPrinterProperties").Value > printer_properties.txt [copy to clipboard]</pre>	:
Upload printer's properties file Datei auswählen Keine ausgewählt [Upload]	
Download current printer's properties template file	
[Download]	
Delete current printer's properties template file	
[Delete]	
Close	

On your workstation install a printer using the Toshiba V4 driver and modify it's configuration. All the settings stored at **Device Settings** will be included to the property file.

望 IntuneDistribut Print Preferences	×	
C g Quality Watermark Overlay Others About	> Ø ?

{

Include personalized token in URL

Use this option to add a user-specific token to the IPP-printer URLs.

It should only be disabled if multiple users are using the same PC and if you can make sure that the username of the currently logged in user is added correctly to the print job PJL-header.

9.4.2.1.6 Self-assignment / registration

e-Follow cloud			*)) (
	Username:		
	Password:		٢
		[Microsoft login] [Create account] Ren	nember login Log in
Version: 5.5.0 RC01			den EN ▼

Allow self-registration

If enabled users can self-register an internal account to e-FOLLOW.cloud. An appropriate link will be shown on the User Portal login page.

Allow E-Mail self-assignment

If enabled the users may add additional E-Mails to their account. This will allow the user to send print jobs by from other mail accounts.

Allow Alias self-assignment

If enabled the users may add additional Aliases to their account. This will allow the user to send print jobs under another user context (e.g. from SAP)

Accounting-Mode

Here you can define the accounting mode for users, that have self-registered to e-FOLLOW.cloud.

Self assignment		
Allow self-registration		Ð
Allow email self assignment		
Accounting	Quotas	~
Allow password reset for internal users		
Validity time of the password reset email (in minutes)		5

Allow to change password for internal users

If enabled internal users (not synchronized with a directory service) are allowed to change their password.

Gi

This can also be important for users that have been created automatically - e.g. by sending a job via email. In this case the password is initially blank and can be set by the user themselves.

Allow password reset for internal users

If enabled internal users will see a [Forgot Password?] link in case the password they entered was wrong.

An email to reset the password is sent to the user. The reset Link in this mail must be used before the **Validity time of the password reset** time expires.

9.4.2.1.7 Print Job List

This option will enable/disable the print job list in the user portal.

Currently the user will have the option to preview the job, to delete the job or to reassign it to another user.

Allow users to reassign their jobs to other users If enabled users will see the option to change the ownership of their own jobs in the print job list.

To assign a job to another user the 'recipient' needs to allow that users can assign jobs to him.

If disabled he will not be selectable for other users.

Unknown users

Here you can define the behaviour of PopUp if a job from an unknown user is received by e-FOLLOW.cloud

Unknown users' profile

Here you can define what type of PopUp shall be used for unknown users.

Create unknown users automatically when they login by PopUp for the first time

If enabled an unknown user that authenticates himself via e-FOLLOW.cloud PopUp will be automatically added to the e-FOLLOW.cloud database.

Download

At the download section you can download the e-FOLLOW PopUp.exe with integrated configuration. You can also see and modify the configuration. Every time when you download e-FOLLOW PopUp.exe the current configuration will be integrated.

More information about the configuration option can be fould at chapter:

8.4.5 Executing the e-FOLLOW client PopUp

9.4.2.3 IppInstaller

Here you can generated preconfigured lppInstallers for all Virtual queues.

Installation type EXE with configuration

If selected lppInstaller.exe with included configuration (metadata info of the file) can be downloaded. When this executable is started it will automatically download all necessary files and install the IPP printer.

Installation helper as ZIP archive

If selected a Archive (.zip) can be downloaded. This archive will contain all necessary files to install the IPP printer.

Installation helper as MSI installer

If selected a Windows Installer (.msi) can be downloaded. This installer contains all necessary files and will install the IPP printer. When the user uninstalls it, also the IPP printer will be uninstalled.

Installation helper silent mode

This option will turn on silent mode for all installation helpers.

Printer driver

Here you can select the default printer driver that will be chosen for building the lppInstaller packages.

Printer properties

Here you can select if the printer properties file should be included to the lppInstaller package. More informations about the printer properties can be found here: 9.4.2.1.5 Include printer properties template with lppInstaller package

User (for personalized installer)

If a user is selected, a personalized lppInstaller package for this user can be downloaded. In this case the IPP Url will contain informations about the user. When the field is empty the lppInstaller package with default IPP Url can be downloaded.

It is also possible to create an lppInstaller package mHere you will find an lppInstaller ZIP archive to create your own installer.

Download: IppInstaller.zip (version: 2.0.0)

9.4.2.4 Local Print Module

The e-FOLLOW.cloud Local Print Module will enable local print spooling on Client-PCs. It also will automatically create the needed local printer(s).

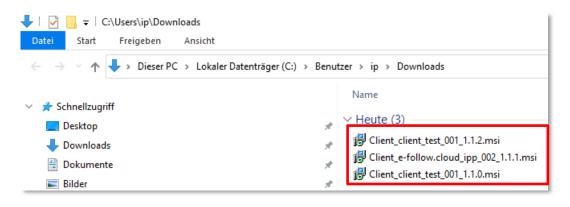

The Local Print Module is not enabled by default. It is an optional module, which can be purchased.

							⊕ ◯ 🗩 🤇

Many different configurations can be created by pressing [Add new configuration]. For each configuration a MSI installer can be downloaded. This MSI installer will be generated when you press download. It does contain the configuration, printer driver, printer properties and executable for the windows service. Only one configuration can be installed on a Client-PC.

Everytime you make a change at the configuration settings and generate and download the MSI installer, the version number of the installer will be increased. This is necessary in order to carry out upgrades correctly.

On the Client-PC only a upgrade is allowed. Downgrade to a lower version number is not possible.

The MSI installer will install a windows service with the name: e-FOLLOW Local Print Module ... This windows service then will automatically install the local printer(s) with a raw printer port to IP address 127.0.0.1.

When the user prints one job to this printer, the print job will be stored encrypted on his PC and the job informations will be sent to the e-FOLLOW.cloud instance.

The windows service also starts polling to the e-FOLLOW.cloud instance for the next operations (delete job/release job).

These print jobs will now have the same functionality as every job in e-FOLLOW. In the management you only see the difference if you check the print job details:

Before releasing one Job (IPPS is used for this) the Client-PC checks if he can reach the MFP by IPPS. If there are any errors an message will be displayed on the MFP display. More details can be found at the dashboard of the management.

For the detailed settings you can select one or more queues and click on configure:

DEVICES Virtual Queues	Local Print M Chrome Ex	<u> </u>	[+]	[-]	[Configure]	[Generate and download Configuration ID: 001		
Toshiba	_		e-follow.cloud					×
Queue e-follow.cloud	Local printer name e-follow.cloud	TOSHIBA V4 Printe	Printer driver er Driver v10.70 x64		~	Include printer properties	Local print por 9101	t
						[Cancel]	ок	

There you can set up the Local printer name. This will be the name of the printer which will be automatically installed on the Client-PC.

You can also select one of the default printer drivers. The printer properties are containing the printer settings for the TOSHIBA V4 printer driver.

New printer drivers and the printer properties are currently only configurable at SETTINGS \rightarrow User portal & User tools \rightarrow Userportal.

Because the windows service starts a local TCP listener for each printer the local printer port has to be unique.

The MSI installer is not signed with a digital signature. The digital signature is needed to deploy the MSI installer in a Windows Active Directory environment.

To digitally sign the installer, send a request to support@control-systems.de with a download link (e.g. wetransfer.com) to the MSI installer.

Alternatively, you can check this setting in the properties of the downloaded MSI installer:

9.4.2.5 Chrome Extension

With the e-FOLLOW Print Chrome Extension you can easily distribute e-FOLLOW queue to users which are using Google Chrome browser or working on a Chrome Book.

It can be retrieved from the Chrome Web Store or directly from this URL: <u>https://chromewebstore.google.com/detail/e-follow-print/fjpnapffembidnjnpnicglbfadococcp</u> Or click on the link at SETTINGS→User portal & User tools→Chrome Extension.

achrome web store	Q Erweiterungen und Designs suchen	
Discover Erweiterungen Designs		
C e-FOLLOW Print	Aus Chrome of	entfernen
Erweiterung Workflow & Planung 7 Nutzer		

After installing the extension it will show it's options dialog. When you are using it outside a Google Workspace or the admin hasn't set the policy for the extension you have to enter the UID (for e-FOLLOW.cloud) or Hostname (for e-FOLLOW).

At the Main page of the extension you can access you PIN-Code for login at Toshiba devices.

* 2	* • 5
e-FOLLOW Print Options v1.0.0	e-FOLLOW Print V1.0.0
UID/Hostname cs-test	PIN-Code for login at Toshiba devices *** ④
Send notifications?	Options
Reload extension (can fix some issues) Reload	
Main page	

The e-FOLLOW queues then will be shown additional to the other available printers when the user selects a printer.

Configuration without Google Workspace

First the users have to install the extension and then they have to enter the shown value at UID/Hostname at the Options screen of the Chrome Extension.

Adminstrators in a Window Domain can also deploy the registry value from the "Policy for extension" to the users. Then they don't have to enter UID/Hostname at the Options screen of the Chrome Extension.

Configuration for Google Workspace

When the users are organized in a Google Workspace the e-FOLLOW Print Chrome Extension can be installed and configured automatically.

When you want to distribute the Extension to the users for your Google Workspace you need to execute the following steps.

Login to you Google Workspace Admin Console and go to Devices \rightarrow Chrome \rightarrow Apps & extensions \rightarrow Users and Browsers

= 🔿 Admin	Q Search for users, groups or settings

Default paper format

Default paper format for the printers

Create users automatically from Google Workspace as internal user Create users automatically from outside Google Workspace as internal user Here you can allow or deny the automatical user creation for Google Workspace users or users outside the Google Workspace.

At the Default user settings or Default user settings outside Google Workspace you can set the default values for new users.

For more details about the default user values see: 9.1.7.6 Domains - Default user

Delete users automatically:

Additionally you can setup that users will be automatically deleted, when they have no print jobs in a virtual queue.

Delete users automatically even if they have jobs: Use this setting ff the users should be deleted even when they still have jobs in a virtual queue.

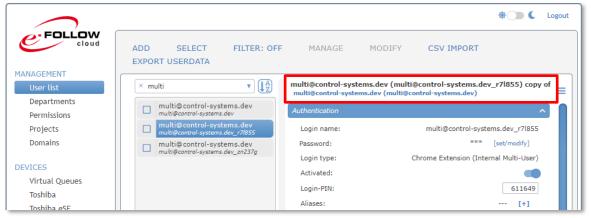

If the Google e-mail address of the user is not know at e-FOLLOW, printing with the Chrome Extension is not possible. Therefore the users autocreation has to be enabled or a user with the Google e-mail address as login name or e-mail address must already exist in e-FOLLOW.

Multi-Users

Here you can set up users, which are usually used by many individuals like "guest or student".

When you now login with a Multi-User account on new Chromebook or Chrome browser a copy of the original Multi-User will be created. The copy of the Multi-User account will have "_xxxxx" added to the login name, where "xxxxx" stands for random characters. Also the copied user will get a new random PIN.

At the user list these users are shown in this way:

When you delete the original Multi-User account also the copied Multi-User accounts will be deleted.

PIN length: Set here the length of the PIN für copied Multi-Users.

Account jobs of the copied Multi-Users to the Multi-User template account: Use this setting if the job accounting should be assigned to the Multi-User template instead of the Mulit-User copy.

Delete users automatically:

Additionally you can setup that Multi-Users copies will be automatically deleted, when they have no print jobs in a virtual queue.

Delete users automatically even if they have jobs:

Use this setting ff the Multi-Users copies should be deleted even when they still have jobs in a virtual queue.

9.4.3 Dashboard

The e-FOLLOW.cloud Dashboard is the central point of information.

9.4.3.1 Top Usage

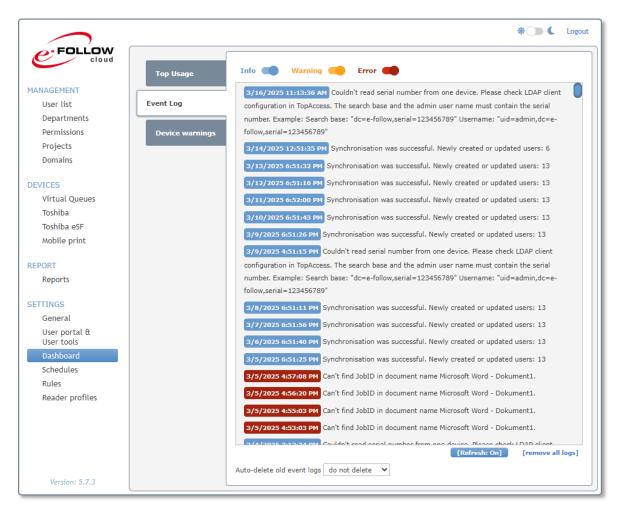

The Top Usage section provides an overview of the monthly printed pages and uploaded file sizes.

9.4.4 Schedules

A lot of tasks In e-FOLLOW.cloud can be performed automatically. e-FOLLOW.cloud provides a powerful schedule tool for defining and planning the execution of these tasks.

[1] Task list

The task list can hold an unlimited number of scheduled tasks. Click to **ADD** to create a new task or click to **DELETE** to remove an existing task from the list.

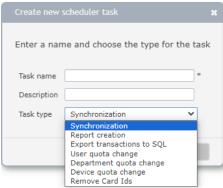

When adding a new task, you need to enter a task name and the type of the task. It is also recommended to enter a short description.

[2] Schedule

The schedule section defines when a task is executed. Select the date and time for the next (fist) execution. Then select the repetition options.

[3] Task details

This section describes the details of the scheduled task.

9.4.4.1 Synchronization

This will automatically synchronize the e-FOLLOW.cloud user database and the domain.

You can select if new users shall be added and/or what data shall be updated if they have changed in the domain.

If new users are added to the database a random Login PIN can be created and sent to the new users email address.

Task type: "Synchronization"			
Domain:	[show domain settings]	CSAAD	*
Add new user			
Generate random PIN for new users			
PIN length			3
Send generated PIN to user by email			
Synchronize user's alias			
Limit and shorten alias to allowed characters for windows login			
Remove existing aliases before Import

9.4.4.2 Report creation

This task will automatically create a report and send it as an attachment via e-mail.

Here you can select the type of the report that shall be scheduled. Select the sorting order and the file type.

Task type: "Repor	t creation"		
Send report to all users	(?)		
Recipient e-mail address	?		[show details]
Report:		User - summary	✓ [show report]
File type			.pdf ○.csv

If you like to automatically receive reports like "last

month device summary" or "Ytd total of department X" it is recommended to create a custom report first and have this scheduled here.

9.4.4.3 Export transactions to MS SQL

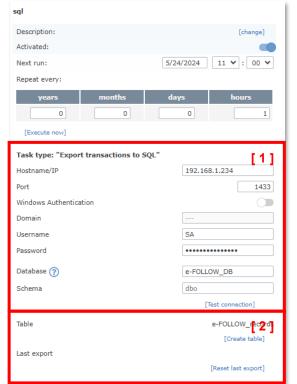

This task will export the transaction data (user's copy-, print-, scan- and fax-activities) to an external SQL database.

[1] Enter the database details and credentials.

If allowed by SQL Server, you can also use Windows Authentication.

[Execute now] will run the task immediately.

Use the **[Test connection]** link to check if e-FOLLOW.cloud can establish a connect to the selected SQL-database.

[2] The table **e-FOLLOW.cloud_records** will be created by clicking to the [Create table] link.

If the table already exists it will be deleted (dropped) and created new.

Drop and create table?	×
Drop table 'e-FOLLOW_records' and create new table? This must be done before the first run, if table wasn't already created by another e-FOLLOW serv	rer.
[Cancel] OK	

e-FOLLOW.cloud remembers the records already exported to the MS SQL database. In case you need to export again all data – e.g. after recreating the table – you can reset the last export by clicking to [Reset last export]

a

In addition to the default reports the device's serial number, Model, Location and description are exported to the SQL database.

At current no other SQL databases than MS SQL are supported.

9.4.4.4 Change quota (user, department, device)

This task will automatically add or set quotas. Depending the task type quotas will be set for users, departments or e-BRIDGE X devices.

Select the type of quota (total, color, copy, print, fax, etc.), if it shall be set to an amount of pages or added to the current quota and finally the amount of pages.

Then select if this task shall be applied to all users or to individual users / departments / devices.

Task type: "Quota change" Add total quota 500 Pages Image: Second state sta	Ignore missed tasks:	
For all users	Task type: "Quota change"	
	Add total quota 💙 500 Pages	
O For users from list:	For all users	
	O For users from list:	

If you enable the switch **Ignore missed tasks** e-FOLLOW.cloud will not retry to execute tasks that could not be run at the scheduled time due to any reason.

9.4.4.5 Remove Card IDs

This task will remove the association of card IDs to user accounts. This may make sense if a set of 'one day' cards is emitted to users that have forgotten their personal card or if cards are replaced every X months/years.

Select if all card ID associations shall be removed or if only the card IDs from the below list shall be removed.

Task type: "Remove Card Ids"			
○ Remove all card Ids			
Card Ids from list:			
1234			
	[+]	[-]	

Use [+] and [-] to add or remove card IDs to / from the list.

9.4.5 Rules

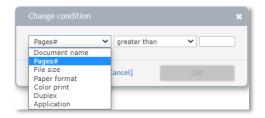

e-FOLLOW.cloud provides a very convenient and powerful tool to apply rules for routing and converting of print jobs.

	A 🗇 🕻 Logo
Cloud	ADD REMOVE ACTIVATED: ON FINALIZE CHANGES 🕢
MANAGEMENT User list Departments Permissions Projects Domains	Q. Search force BW [change] Image force BW [change] Condition: Document name contains 'az22' [change] Action: Convert to black&white [change] Notification: Image Image Applies to: Image Image
DEVICES Virtual Queues Toshiba Toshiba eSF Mobile print REPORT Reports SETTINGS General User portal & User portal & User tools Dashboard Schedules Rules	Users: Departments: ALL GF [+] [-] [+] [-] Queues/Printers: Security groups: e-follow.cloud ALL [+] [-] [+] [-] Entra ID groups: Entwicklung
Reader profiles	[«] [<] [»] [*] [*] [*] [*] Page: 1 V [Switch to editor]

This enables you to setup a very sophisticated rule based print management system.

Based on several conditions

Conditions	
Document name	Contains
	Ends with
	Starts with
Pages #	Greater than
	Less than
File size	Greater than
	Less than
Paper format	Unknown, A3, A4, A5,
Color print	Y / N
Duplex	Y/N
Application	

A specific action can be executed.

Actions	
Delete	-
Convert to	Black & White
	Duplex
	B&W + Duplex
Move to queue	[virtual queue]
Change user	[username]

If the condition was met, following action will be invoked	for the job:
Convert to 💙	
Black & White 🖌	
Black & White	
Duplex [Cancel] 0	к
B&W + Duplex	
Erasable Blue	
EB + Duplex	

You can define as many rules as you like. Use the arrows behind the rule name to change the order of execution.

If enabled a Notification is sent to the user if the job has been processed / modified due to this rule.

For each rule you can define if it is a 'general' rule or if It shall apply to specific users, departments or groups.

Notification:		•••
Applies to:		
Users:		Departments:
ALL		GF
[+]	[-]	[+] [-]
Queues/Printers:		Security groups:
e-follow.cloud		ALL
[+]	[-]	[+] [-]
Entra ID groups:		
Entwicklung		
[+]	[-]	

To not disturb current printing of users you can switch off the e-FOLLOW.cloud rule system by clicking to the **ACTIVATED** button.

Once it's Off you can add or modify rules without taking effect on current printing.

When you have done any modifications on rules the FINALIZE CHANGES status changes to

FINALIZE CHANGES (]

				寮 🗇 🕻 Logout
er FOLLOW cloud	ADD REMOVE	ACTIVATED:	ON FINALIZE CHAN	iges 🚺
MANAGEMENT User list Departments Permissions Projects Domains	Q Search force BW move large		force BW [change] Condition: Action: Notification:	Document name contains 'az22' [change] Convert to black&white [change]
DEVICES Virtual Queues Toshiba eSF Mobile print REPORT Reports SETTINGS General User portal & User portal & User tools Dashboard Schedules Reader profiles			Queues/Printers: e-follow.cloud	Departments: GF [-] [+] [-] Security groups: ALL [+] [-]
	[«] [<] [Page: 1	>] [»]	[+] [-]
Version: 5.7.0	[Switch to editor]			

Clicking to FINALIZE CHANGES (]

will generate the script and save it to the database.

The FINALIZE CHANGES status is changing to 🕢 .

e-FOLLOW.cloud is using the Python script language. By clicking to the [Switch to editor] link on the bottom you have direct access to the script editor.

Attention

any changes done inside the editor may lead to malfunction of the rules system. This editor is intended for administrators only being very familiar with the Python syntax.

i

<pre># coding=UTF-8 def runScript(job):</pre>
<pre>#Rule 1: force BW if "az22" in job.DocumentName.lower() and job.Department in ["GF"] and job.QueueName in ["e-follow.cloud"]: job.ConvertToBW("force BW", True)</pre>
<pre>#Rule 2: move large if job.Pages > 100: job.MoveTo("efollow-cs-test-0\\e-follow.cloud", "move large", False)</pre>
return job

Make sure to activate the rules system by clicking to the **ACTIVATED** button before leaving this page.

9.4.6 Reader Profiles

				₩) (1	Logout
e. FOLLOW	ADD REMOVE				
MANAGEMENT User list Departments Permissions Projects Domains DEVICES Virtual Queues Toshiba Toshiba eSF Mobile print REPORT Reports SETTINGS General User portal & User tools Dashboard Schedules	ADD REMOVE	Skip at front Skip at end Characters to use Revert byte-by-byte Convert Format Default profile for new devices	Test string		
Rules Reader profiles Version: 5.5.0 RC01					

Card reader profiles are used to modify the string read by a card reader.

This can be required if the UIDs of your cards are already stored in active directory. Depending how the IDs are read by the reader the IDs might need to be converted or reversed so they match.

To add a new profile click to [+].

You can enter a test string to directly check the impact of the current settings to the string.

You can use the *Test string* field to insert data and check if the conversion is working properly according the data that are required.

10 Using IppInstaller packages

From the UserPortal users have access to the Installer-packages of IPP queues.

FOLLOW					₽ ()
	Туре	Name	Installer 🕷	I	Details
Ingo Pfeiffer	IPP	e-follow.cloud	IppInstaller.exe Archiv (preconfigured) (.zip		Show details
History					
Print jobs					
Upload					
DOLS					
Install Printers					
CCOUNT					
Settings					
Permissions					
Logout					

Any kind of lppInstaller must be run as administrator.

10.1 IppInstaller.exe (preconfigured)

After executing lppInstaller.exe (preconfigured) it will download all necessary files to a directory with the same name as the executable. Also a log file is generated, which can be sent to the support in case of problems.

🖊 🖸 📙 🖛 Down	loads

	Install Print	Printer with name "IPP-Queue" already exists. Please choose another printer name.			
		ОК			

It will also check if the printer name already exists and will force the user to user another printer name.

10.2 IppInstaller ZIP archive

The lppInstaller ZIP archive contains all files which are needed. The configuration is included as the file config.cfg. The user has to extract the ZIP archive and run the lppInstaller.exe.

Name	Größe	Gepackte Größe
driver	38 873 729	18 932 419
config.cfg	165	170
📧 lppInstaller.exe	101 376	36 485
🍘 printer_properties.txt	14 270	2 990

The lppInstaller is the same as mentioned above. It will also check for existing printer name and will also write a log file.

10.3 IppInstaller MSI installer

The MSI installer will install the lppInstaller to the desired location and will then execute the same lppInstaller as mentioned abve.

e-FOLLOW IPP Printer installer (FOLLOW W in the (e- Ca	e-FOLLOW IPP Printer installer (e- Destination Folder Click Next to install to the default f	follow.cloud) S older or click Cha	Setup —	(IPP-Queue) Setup		×

		e-FOLLOW IPP Printer installer (e-follow.cloud)	Control Systems GmbH & Co.KG	15.06.2023	16,7 MB	2.0.1

11 Manual creation of IPP Printer-Installer

Beside of the autogenerated lppInstaller packages from the user-portal it is also possible to create an installer ZIP-archive manually. The package can be downloaded from the \rightarrow SETTINGS -> General \rightarrow Instructions & Configuration page.

Instructions &	Instruction to set up Toshiba e-BRIDGE Next devices	~
Configuration	Instruction to set up Toshiba eSF devices	
	Windows PopUp	~
Database / Support	IppInstaller	^
_	Download:	
License information	IppInstaller.zip (version: 2.0.1)	

IppInstaller.exe must be executed as Administrator

There is also a silent version of lppInstaller, lppInstallerSilent.exe.

Before executing lppInstaller it needs to be customized for your specific needs.

🥙 e-FOLLOW IPP Pri	inter Installer v2.0.1 X
Printer name:	IPP-Queue
IPP server URL:	https://ipp-cs-test.test.e-follow.cloud:443/IP
Printer driver:	TOSHIBA V4 Printer
Install certificate	
Install printer driver	
	Install Printer

IPP Installer consists of these components.

Name	Тур	Komprimierte Größe
driver	Dateiordner	
config.cfg	Configuration-Quelldatei	1 KB
📧 lppInstaller.exe	Anwendung	33 KB
📧 IppInstallerSilent.exe	Anwendung	33 KB
🎱 ReadMe.txt	TXT-Datei	1 KB

IppInstaller.exe	the installer program
IppInstallerSilent.exe	The same installer program but with build in silent parameter
config.cfg	the configuration file for lppInstaller
driver	Subdirectory holding the printer driver for the IPP/IPPS Queue

This allows you to create individual lppInstaller-packages, suitable for your current requirements.

e.g.

- packages for each IPP/IPPS queue
- packages for IPP/IPPS queues to be installed on PCs running inside your local network
- packages for IPP/IPPS queues to be installed on PCs running outside your local network

11.1 IppInstaller config.cfg

lppInstaller can get its configuration from command line parameters or config.cfg. If you download lppInstaller from the user-portal the configuration is included to the .exe file. The configuration from config.cfg has priority over the included to .exe file configuration. And configuration by command line parameters has priority over config.cfg.

E.g. the config.cfg file for lppInstaller can look like this:

```
config.cfg - Editor -- C X
Datei Bearbeiten Format Ansicht Hilfe
server=https://
name=e-follow.cloud
forceinstalldriver
readonlyserver
lang=en
```

Parameters (for command line and config.cfg):

debug	This will add more detailed information to the installer-log. It can be disabled by # or by removing it from the config.cfg file.
server= *	This defines the full URL of the IPP/IPPS printer to be installed. Make sure to enter the correct URL.
name=	shown name of the printer
silent	If enabled the installer will run in silent mode. It can be disabled by # or by removing it from the config.cfg file.
forcecertificate	If there is an .cer file in the certificate directory it will be forced to be installed. Not needed for e-FOLLOW.cloud
forceinstalldriver	If there is an driver in the driver directory it will be forced to be installed.
download_driver=	Download driver as ZIP archive from the given URL. The ZIP archive will be extracted at the start of lppInstaller.exe.
download_cert=	Download certificate from the given URL.
download_printer_properties=	Download printer properties file from the give URL. Explanation to get this file can be found at the e-FOLLOW.cloud Management→Settings→General→User Portal
readonlyserver	IPP Server URL is read only
readonlyname	Printer name is read only
lang=	Lanuage of IPP Installer. Currently available: de en
uninstall	Uninstall IppInstaller
uninstallall	Uninstall lppInstaller and remove printer

*) Make sure to use the correct URL.

[1] Select the IPP printer / virtual queue of your choice

[2] Click to 'Virtual IPP queue – IPP URLs'[3] Copy the URL – external IPPS

MANAGEMENT User list Departments Permissions Projects Domains	efollow-vm-dev (172.16.0.4) Q Search queue virtualQ ipp (105 Jobs) (3 Jobs)		NiterManager] Virtual IPP queu Auto doloto jobo t SELECT R Name		[2] an printed after 3 hours FILTER: OFF MODI	FY ime v

NetCardReader Mobile print			oot Certification	Authorities for	rs on this print server local computer) anywestcentral.cloudapp.a	zure.com:443/test	[copy u[]3] OK

11.2 IppInstaller – driver

IppInstaller allows you to install any driver of your choice.

Copy the full content of the driver package to the driver folder.

Make sure the driver's .inf file is located in the root of	 IppInstaller > driver 	~	õ	2
the\driver folder	Name			Änder
	🤗 esfбu.cat			05.02.
	🚳 eSf6u.dll			05.02.
	📄 eSf6u.gpd			05.02.
	eSf6u.inf			05.02.
	📓 eSf6u.ini			05.02.
	eSf6u.ver			05.02.
	eSf6u.xml			05.02.
	eSf6uaddprinter.dll			05.02.
	🚾 eSf6uaddprinter.zip			05.02.
	Cff. Jacob all			05.02

If there is a ZIP archive with the name **driver.zip** in the lpp Installer root directory at start it will be extracted to the folder **driver**.

You can also specifiy one URL with **downloaddriver=** where **driver.zip** can be downloaded.

a

IppInstaller is optimized for Toshiba V4 Printer Driver and Toshiba Universal 2 printer driver.

11.3 Roll out IPP printer with group policy

In case you like to roll out an IPP/IPPS queue to clients via policy it is recommended to

- roll out the certificate to client's Trusted Root Certification Authorities
- place the lppInstaller-package on a Server that all clients have access to
- create a .batch file executing lppInstallerSilent.exe
- Add the batch to clients GPO startup script

12 Roll out IPP printer with Intune

Create a new empty folder with any name.

File Home Share View				~ (?
$- \rightarrow \cdot \uparrow$ \rightarrow This PC \rightarrow [Desktop > Intune		✓ ♂ Search Intune

Click Add to finish the installation of the virtual queue on your MAC.

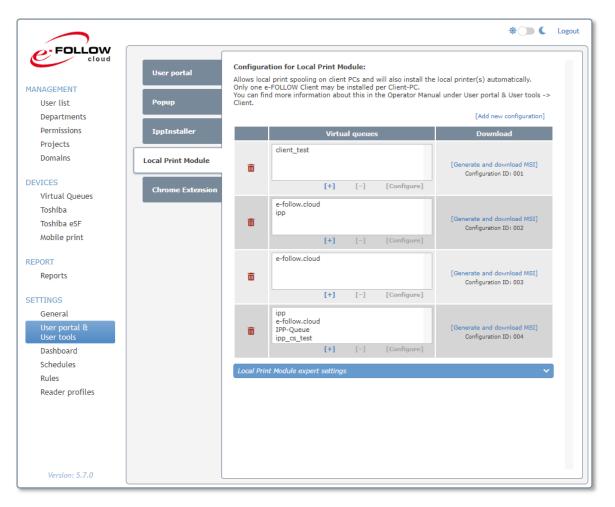

14 Printing from Chromebooks

i

These steps are not needed any more when the e-FOLLOW Chrome Extension is used. See: $\ensuremath{\textbf{0}}$

The e-FOLLOW.cloud Local Print Module will enable local print spooling on Client-PCs. It also will automatically create the needed local printer(s).

The Local Print Module is not enabled by default. It is an optional module, which can be purchased.

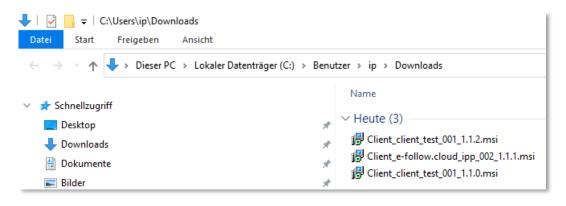

Many different configurations can be created by pressing [Add new configuration].

For each configuration a MSI installer can be downloaded. This MSI installer will be generated when you press download. It does contain the configuration, printer driver, printer properties and executable for the windows service.

Only one configuration can be installed on a Client-PC.

Everytime you make a change at the configuration settings and generate and download the MSI installer, the version number of the installer will be increased. This is necessary in order to carry out upgrades correctly.

On the Client-PC only a upgrade is allowed. Downgrade to a lower version number is not possible.

The MSI installer will install a windows service with the name: e-FOLLOW Local Print Module ... This windows service then will automatically install the local printer(s) with a raw printer port to IP address 127.0.0.1.

When the user prints one job to this printer, the print job will be stored encrypted on his PC and the job informations will be sent to the e-FOLLOW.cloud instance.

The windows service also starts polling to the e-FOLLOW.cloud instance for the next operations (delete job/release job).

These print jobs will now have the same functionality as every job in e-FOLLOW. In the management you only see the difference if you check the print job details:

Before releasing one Job (IPPS is used for this) the Client-PC checks if he can reach the MFP by IPPS. If there are any errors an message will be displayed on the MFP display. More details can be found at the dashboard of the management.

For the detailed settings you can select one or more queues and click on configure:

	Chrome Ex	tension	[+]	[-] [Configur	e]		
Virtual Queues Toshiba	_		e-follow.cloud				
Queue	Local printer name		Printer driver		Include	printer properties	Local print port
e-follow.cloud	e-follow.cloud	TOSHIBA V4 Printer Driver v10.70 x64 🗸		No	~	9101	

There you can set up the Local printer name. This will be the name of the printer which will be automatically installed on the Client-PC.

You can also select one of the default printer drivers. The printer properties are containing the printer settings for the TOSHIBA V4 printer driver.

New printer drivers and the printer properties are currently only configurable at SETTINGS àUser portal & User tools àUserportal.

Because the windows service starts a local TCP listener for each printer the local printer port has to be unique.

The MSI installer is not signed with a digital signature. The digital signature is needed to deploy the MSI installer in a Windows Active Directory environment.

To digitally sign the installer, send a request to support@control-systems.de with a download link (e.g. wetransfer.com) to the MSI installer.

Alternatively, you can check this setting in the properties of the downloaded MSI installer:

Chrome Extension

e-FOLLOW can not only receive print jobs from Windows clients but also from Chromebooks.

The challenge for printing from Chrome to e-FOLLOW server is the personalization of print jobs (assign a printjob to its owner). By default, all jobs are sent "anonymous".

e-FOLLOW can cover this by providing individual IPP URLs for each user. Once enabled in \rightarrow SETTINGS \rightarrow General \rightarrow Userportal \rightarrow

the IPP-Printer tab appears in the user portal.

Type Name	Installer 📲	Details
IPP-Queur	IppInstaller.exe Archive Windows (preconfigured) (.zip) Installer (.msi)	Show details
	Details Use personalized URLs below to add IPP printers to yor system. Name IPP-Queue Printer URL https://ipp-cs-test.test.e-follow	

Here you will find the list of available IPP virtual queues and IPP printer queues followed by their personalized URLs.

To add a personalized queue to your Chromebook follow the steps as described below.

Personalized URLs may not only be used on Chrome but also on any other client that can print using the IPP protocol.

15 eSF Scan-to-Folder setup

Toshiba eSF devices come with a convenient Scanning-App called 'Scan Center'

This chapter describes the relevant settings for *Scan Center* Scanner App so users can easily scan to their HomeDirectory folder defined in A.D. or another LDAP-Server.

Open the device's website and run the Scan Center Configuration.

In Network Folder: Klick to Create Nework Folder			
	Create Network F	Folder

	Password		
	Test Connection		
	 Advanced Options 		

Authentication Options

Ask for user name and password: if the users login to e-FOLLOW.cloud by e.g. PIN or Card this option will request the user's credentials when scanning.

Use static username and password: this option allows to define a 'global user'. Make sure that this user has write permission to all user's HomeDirectories.

Scan Center * Scan After launching the Scan Center App select Network Folder. 🔧 Scan Settings 300 dpi, 1-sided ... 0 -----Network Folder None \square 💼 E-mail None Printer None Network Folder * Scan +) Create Network Folder 00 Scan2MyHome 1 0 Q sepp ģ Skip Log In ¢

Select the ScantMyHome target

If required, the user gets prompted to enter his credentials

16 Advanced Settings

This chapter describes advanced Administrator settings that should only be done in case of malfunction or / and or if Toshiba support requested you to modify any of these settings.

Change of any of the following parameter may have severe impact on proper functionality of your e-FOLLOW.cloud setup.

16.1 Single Print Timeout

If deletion of jobs at user logout or after error is enabled e-FOLLOW.cloud printing mode is changed to single print. In case a the finish event of the current job is missing subsequent printing is blocked. The SinglePrintTimeout defines the time after the printing for this user will be reseted if there are no events from his print jobs.

Change to Expert settings – DataManager and search for SinglePrintTimeout

Default value [ms] 1.800.000 = 30 min.

16.2 Project Code from PJL

e-FOLLOW.cloud can extract the project code for a print job from its PJL header. In → SETTINGS -> General → Expert settings select the PrinterManager and find the parameter *ProjectCodeFromPjI*.

Here you can enter the PJL tag containing the Project Code. (e.g. @*PJL COMMENT DSSC PRINT ACCESSCODE*=)

16.3 HID Omnikey 5427 CK configuration

HID provides documentation for their readers that describes how to configure KBW mode. See Chapters 2 and 3 in this document.

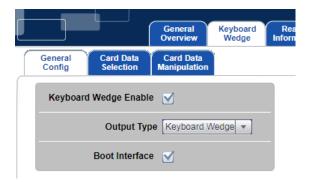

https://www.hidglobal.com/documents/omnikey-5x27ck-keyboard-wedge-configuration-user-guide

Keyboard mode configuration of this reader is complex and requires "boot interface" device

keyboard mode option enabled as well as [ENTER] post keystroke for each supported card type to work properly with our printers.

No extra apps or drivers are needed.

• 1) Enable Keyboard Wedge and Boot Interface

• 2) Configure all card types that are needed and set the Poststroke to [ENTER]

	General Overview	Keyboard Wedge	Reader Information	Contactless Config	Host Interfaces	System Config	System Consoles	About
General Config Selection	Card Data Manipulation
